

Prevent the flu. It's worth a shot.

We may not have a vaccine for COVID-19 yet, but we do have a vaccine for the flu.

If we get a wave of COVID-19 cases at the same time as flu cases, our hospitals could become too crowded.

Protect yourself and your loved ones.
Get a flu shot.

Prevent the flu. It's worth a shot.

**Everyone older than
6 months should get
a flu shot.**

The flu shot has been shown to
prevent hospitalizations, serious
illness and even death.

Protect yourself and your loved ones.
Get a flu shot.

Prevent the flu. It's worth a shot.

**If you catch the flu,
fighting it weakens
your immune system.**

A weak immune system can increase
your risk of more serious diseases,
like COVID-19.

Protect yourself and your loved ones.
Get a flu shot.

Prevent the flu. It's worth a shot.

**Hoosiers, we have done
a great job of managing
COVID-19.**

Let's continue the good work by
keeping both flu AND COVID-19
rates low in the coming months.

Protect yourself and your loved ones.
Get a flu shot.
