

REQUIREMENTS

- Eligible organizations must be a HIPAA Covered Entity
- Uses and Disclosures apply per the ClinicalConnect HIE Data Exchange Agreement
- Provider or Health Plan must have an established relationship with the patient/member to receive alerts
- Alerts will be provided for those patients/members who have agreed to be part of ClinicalConnect HIE

For more information, please visit clinicalconnecthie.com

ConnectAlert is a real-time, secure service to notify healthcare providers and health plans of patient/member encounters at an emergency department or hospital.

This service **improves patient care**, provides critical data to **support care coordination**, helps **lower healthcare costs**, and aides in **regulatory compliance** with the CMS Interoperability and Patient Access Rule.

ConnectAlert, while meeting the highest privacy and security standards, supports various notification types, output options and delivery methods.

SUPPORT COVID-19 CARE COORDINATION

- Identify COVID-19 patients
- Focus on high-risk populations to prevent COVID-19 related hospitalizations
- Keep COVID-19 patients in network
- Track COVID-19 patient activity & monitor to facilitate long-term, follow-up care
- Inform care teams of patient status, transitions, and follow-up care.

EASY TO IMPLEMENT

Create panels of Subscribers and their Patients/Members to monitor.

Upload panels into ConnectAlert.

Monitor the alerts which are securely delivered when the patient/member is admitted, discharged, or transferred at an emergency department and/or hospital.
