

Indian Creek Intermediate

ICIS Mission Statement

The Indian Creek Intermediate School creates an educational environment in which each student is challenged and encouraged to achieve his or her potential.

YOUR CAREER WITH US

Where Excellence in Education
is the Expectation

Indian Creek Intermediate School serves students in grades three, four, and five. Having only three grade levels allows opportunities to tailor our academic curriculum and our special activities and programs to meet the unique needs of our students.

The ICIS staff is very caring and dedicated to giving each student the best education possible. ICIS staff is highly involved in the staff development process and the creation of standards-based curriculum to make learning and instruction relevant to the students. The Parent Teacher Organization is very active and supportive of the school academic programming. Many adult volunteers enhance the social and academic learning process. All parents are encouraged to be an integral part of their child's life at Indian Creek Intermediate School.

Lessons are designed to teach the curriculum while instilling sound morals and a positive work ethic teaching kids personal responsibility. Cooperation in and out of the classroom setting is expected and teachers present many opportunities for students to work in cooperative groups. Each student in the building has a Chromebook that they use throughout the day to meet the academic activities presented to them. The average class size is less than 24 students. For fifty-five minutes each day, students participate in Art, Music, or Physical Education. Our media specialist instructs students in library skills and oversees the school-wide reading incentive program that gets students excited about reading. Students have access to multiple electronic learning programs.

ICIS consistently places near the top of Johnson County in the standardized assessments given to students across the state. The students' language arts and mathematics ISTEP scores are consistently the highest while comparing Morgan County schools as well. The third grade students have passed the IREAD3 Assessment at 90% or higher on the first assessment for each year the assessment has been in existence. The success on the assessments is great, but preparing the students for future success beyond the Intermediate School is our school objective.
