

## Improving the lives of people with chronic wounds

The Wound Healing Center offers state-of-the-art outpatient clinical wound care and hyperbaric medicine. We specialize in advanced wound care, using a variety of clinical treatments, therapies and support services to treat chronic wounds. Our physician-driven, multi-disciplinary approach to outpatient wound care has a superior success rate in facilitating the healing process.

A patient with a wound that has not begun to heal in two weeks or is not completely healed in six weeks may benefit from the proven, best-practice methodologies at the Wound Healing Center.

Our Wound Healing Center is unique in that we provide treatment for chronic venous insufficiency which occurs when your leg veins don't allow blood to flow back up to your heart. Incompetent valves in the leg veins lead to blood flow going the wrong direction (refluxing) in the veins. This increased pressure in the legs can start of sequence of complications with dilated veins.

### Specialists working together for you

Our center is staffed with a unique team of doctors, nurses and therapists all dedicated to healing chronic wounds. The causes of wounds are complex, and our group represents expertise in all of the major areas necessary to handle your varied circumstances and challenges. Whatever it takes for healing to occur, we are equipped and staffed to make it happen.

### Benefits of treatment for:

- Ulcers including diabetic, neuropathic, pressure and ischemic ulcers
- Venous insufficiency
- Traumatic wounds
- Surgical wounds
- Vasculitis
- Burns
- Peristomal skin irritations
- Other chronic, nonhealing wounds

### Scope of Practice

Our practice offers specialized treatment plans developed just for you. We can provide the care you need to get back to normal life. Most of our treatments are covered by Medicare/Medicaid, HMOs, and other private insurance plans. We are experts in caring for people whose wounds have resisted traditional treatment.

We provide treatment for outpatients including:

- Wound Evaluation and Treatment
- Hyperbaric Oxygen Therapy
- Vein Evaluation and Treatment
