## Taking Time to Find Balance in a Hectic World

"The space and quiet that idleness provides is a necessary condition for standing back from life and seeing it whole, for making unexpected connections and waiting for the wild summer lightning strikes of inspiration—it is, paradoxically, necessary to getting any work done." *Tim Kreider*

Convinced by the considerable research that shows we all need downtime, even if we love our work, I spent a productive summer avoiding my regular work and investing in travel, reading, and catching up on those tasks that make my home a comfortable place. The evidence of my indolent labors can be seen in these pictures.

I know that many of you also had the chance to travel or get away from it all. I love seeing what you post on Facebook! For those of you who missed the chance this summer, however, there is still time.

You won't be a good leader if you are exhausted, burned out, or so busy that you can't think straight. How about planning some time this fall visiting a national park, hanging out in a city with fabulous food and wine, or even doing a "staycation" at home? Your family -- and your co-workers -- will appreciate it, and I'm betting your work will improve as well. I know it worked for me.
