

MANUFACTURING SERVICES

Stone Belt's manufacturing services provide a dedicated and skilled workforce and expanded facilities to support area businesses.

about the program

Stone Belt Manufacturing Services gives individuals with developmental disabilities an opportunity to work and develop professional skills while providing valuable sub-contract manufacturing to businesses. Our employees are trained in machine operation, materials and small parts handling, sub-assembly, packaging, warehousing, quality control and industrial hygiene.

facts & figures

37+ years in subcontracted manufacturing
25+ years experience in the life sciences industry
30,000 square feet of manufacturing space (in two facilities)
4,000+ square feet of environmentally controlled space
\$150,000 capital investment in facility improvements
150+ individuals with disabilities employed (in two facilities)
60,000+ hours worked on medical products in 2008
Certified "Dock to Stock" vendor for local life sciences businesses

specialty in life sciences

For over 25 years Stone Belt clients have been involved in the production of biomedical devices utilized around the globe. We are pleased to launch the next phase of our manufacturing program, featuring the installation of 4,000 square feet of environmentally controlled space, more than tripling the capacity Stone Belt has available for life sciences manufacturing.

Our Employees

Our employees are adults with disabilities. They take great pride in their workmanship, the quality of the products they produce and their ability to provide "just-in-time" delivery. This flexible, fast and effective workforce is capable of providing outsourcing opportunities for companies who need to control inventory, increase production, lower production costs or control distribution.

Our Clients

Over 30,000 square feet of manufacturing space, combined with our workers' versatility and proficiency in meeting stringent product specifications and delivery deadlines, has enabled Manufacturing Services to win outsourcing contracts from manufacturers nationwide. Some of our clients include: Cook Medical, Cook Urological, Walnut Springs Water, Carlisle Brake & Friction and Indiana University.
