Harry Potter Bleach logo tee

***Note: Bleach can be a dangerous chemical. Please get help from an adult and follow proper safety precautions while trying this project. If possible, do this project outside.**

***You must dilute your bleach with water or it will be too concentrated and ruin your clothing.**

Supplies: Dark t-shirt, Bleach, Water, Spray bottle, Scissors/Exacto knife, Cardstock, Glue stick, large piece of cardboard, Paper towels

Directions:

1. Choose your Harry Potter emblem of choice! You can either print your design from the computer or draw it yourself. Using scissors or an Exacto knife, cut out your stencil. (Some ideas: Deathly Hallows logo, Platform 9 ¾ logo, Harry Potter silhouette, etc.!)
2. Place your design onto the center of the shirt and attach it using the glue stick. Press firmly on your bleach stencil to make sure you don't have gaps between the shirt and the stencil.
3. Once you've decided how you want it, place the cardboard inside of the t-shirt, being sure that every area that will be sprayed with bleach has cardboard below it. This prevents transfer to the back of the t-shirt.
4. Wearing gloves, pour a 1:1 bleach water solution into your spray bottle. (i.e. If you use 2 cups of bleach, dilute with 2 cups of water)
5. Lay your design flat on the ground, far away from other objects that might catch any overspray. Start spraying your stencil, working from the middle of the stencil outward. Spray a little at a time to ensure you don't overspray the area.
6. Use paper towels to dab any extra bleach that has pooled on the stencil, and then remove the stencil.
7. Leave your items to sit until completely dry.
8. Once dry, rinse your items in the sink. Excess dye will likely run off the clothing. Keep rinsing until the water runs clear.
9. Wash and dry your clothing in a washer/dryer.
10. Enjoy your new stylish Harry Potter clothes!
