PRINCIPLES OF BUSINESS MANAGEMENT • 4562 / BUS X100

Explore how businesses are managed—and learn what it takes to make smart business decisions!

What does it take to run a successful business? In this course, students will explore the role of business managers and learn how businesses operate in today's changing world. Topics will include business management, leadership, organization, decision-making, and business operations.

Students will examine how managers guide businesses through everyday challenges while considering the economic, political, and social factors that influence business decisions. Through real-world examples and business scenarios, students will gain a better understanding of how businesses operate, respond to change, and make decisions that affect employees, customers, and communities.

This course is a great choice for students interested in business, management, entrepreneurship, leadership, marketing, finance, or pursuing a career in the business world.

🎓 **Dual Credit Opportunity: This is an Indiana University Bloomington dual credit course. Students may earn college credit while completing their high school coursework.**

🏛️ **Indiana College Core Connection: This course counts toward the Social and Behavioral Ways of Knowing category of the Indiana College Core (ICC).**

YOUR GUIDE FOR PLANNING WHAT COMES NEXT

Use this section to understand scheduling, graduation requirements, credit options, testing, college planning, and opportunities beyond high school.

COURSES AND SCHEDULING

Transition to High School

Eighth graders are introduced to Indian Creek High School through three programs:

- **Parent Night:** Counselors meet with eighth-grade parents to review high school programs.
- **Classroom Presentations:** Counselors meet with eighth-grade students during the spring semester to explain curriculum and scheduling.

PRINCIPLES OF BUSINESS MANAGEMENT • 4562 / BUS X100

Explore how businesses are managed—and learn what it takes to make smart business decisions!

What does it take to run a successful business? In this course, students will explore the role of business managers and learn how businesses operate in today's changing world. Topics will include business management, leadership, organization, decision-making, and business operations.

Students will examine how managers guide businesses through everyday challenges while considering the economic, political, and social factors that influence business decisions. Through real-world examples and business scenarios, students will gain a better understanding of how businesses operate, respond to change, and make decisions that affect employees, customers, and communities.

This course is a great choice for students interested in business, management, entrepreneurship, leadership, marketing, finance, or pursuing a career in the business world.

🎓 **Dual Credit Opportunity: This is an Indiana University Bloomington dual credit course. Students may earn college credit while completing their high school coursework.**

🏛️ **Indiana College Core Connection: This course counts toward the Social and Behavioral Ways of Knowing category of the Indiana College Core (ICC).**

- **Individual Meetings:** Counselors meet one-on-one with each student to review course plans and answer questions.

Students take their course request sheets home for parent/guardian review and signature. **No schedule changes may be made after May 1.**

Scheduling Process

Each winter, high school counselors conduct small-group scheduling meetings with students in grades 9–11 to plan courses for the upcoming year. Students receive access to the Indian Creek Course Planning Guide and an explanation of the course selection system. After group meetings, students meet individually with their counselor to finalize choices and ask questions. Parents and guardians have a short period to review and approve course requests.

Schedule Changes: Requests must be completed by May 1 of the previous school year. The master schedule is built based on student requests; therefore, no schedule changes will be made after the deadline. Teacher preference requests cannot be accommodated. Schedule changes are permitted only for reasons such as computer errors, course cancellations, conflicts, unmet prerequisites, improper placement, schedule balancing, or administrative reasons. Alternate electives will be used to resolve conflicts.

Intra-Department Course Change Requests: These requests require effort, documentation, and approval from teachers and Student Services.

Indiana law requires all students to carry a full schedule of eight periods. Early release may be granted only for verified financial need requiring employment and must be approved by the building principal.

Specialized Programs and Credit Options

Johnson County Special Services (Applied Courses): Modified instruction for students pursuing an Alternate Diploma, as determined by a Case Conference Committee.

Indian Creek Learning Center (ICLC): An alternative environment providing individualized support. Juniors may not graduate early; seniors may complete coursework early. Students must earn a minimum of seven credits per semester and follow ICHS policies. Juniors perform community service, while seniors complete volunteer or work programs. ICLC students are not eligible for IHSAA athletics or other extracurricular activities.

PRINCIPLES OF BUSINESS MANAGEMENT • 4562 / BUS X100

Explore how businesses are managed—and learn what it takes to make smart business decisions!

What does it take to run a successful business? In this course, students will explore the role of business managers and learn how businesses operate in today's changing world. Topics will include business management, leadership, organization, decision-making, and business operations.

Students will examine how managers guide businesses through everyday challenges while considering the economic, political, and social factors that influence business decisions. Through real-world examples and business scenarios, students will gain a better understanding of how businesses operate, respond to change, and make decisions that affect employees, customers, and communities.

This course is a great choice for students interested in business, management, entrepreneurship, leadership, marketing, finance, or pursuing a career in the business world.

🎓 Dual Credit Opportunity: This is an Indiana University Bloomington dual credit course. Students may earn college credit while completing their high school coursework.

🏛️ Indiana College Core Connection: This course counts toward the Social and Behavioral Ways of Knowing category of the Indiana College Core (ICC).

NHJ Empower (Online Learning): Available to juniors and seniors with a 2.7 GPA. Students must complete an application, attend a parent/student meeting, maintain passing grades, and meet program deadlines. Failure to meet these requirements may result in removal from the Empower course.

Dual Credit Opportunities: Ivy Tech courses (through DualEnroll) and Indiana University Advance College Project (ACP) courses allow students to earn college and high school credit simultaneously. IU tuition is reduced and often covered. Students must request official college transcripts to transfer or document college credit.

Indiana College Core (ICC): Indian Creek High School has partnered with Indiana University Bloomington to offer the Indiana College Core. Students complete a 30-credit-hour block of courses that may transfer to IU or other Indiana public institutions, subject to the receiving institution's policies. The program helps students develop critical-thinking, time-management, and work-ethic skills needed for college. The 30-credit-hour block is equivalent to approximately one year of college coursework and may help students save time and money.

Early Graduation Options

Students may request early graduation through either the **Six-Semester** or **Seven-Semester Graduation** option. Early graduation is available to students who meet the requirements for an **Enrollment Honors Seal, Employment Honors Seal with a Credential of Value, or Enlistment Seal** under Indiana's diploma requirements.

Seven-Semester Graduation

Juniors may apply to graduate after **seven semesters**. To be eligible, students must:

- Be on track to earn an Enrollment Honors Seal, Employment Honors Seal with a Credential of Value, or Enlistment Seal.
- If pursuing the Enlistment Seal, be at least 18 years old and formally enlisted in a branch of the U.S. Armed Forces.
- Earn a minimum 3.0 cumulative GPA.
- Meet required attendance expectations.
- Complete all required Graduation Pathway requirements.
- Submit a completed Seven-Semester Graduation Application.

Approved students may complete **English 12-2, Government, and/or Personal Finance** online through Indiana Online during the summer following their junior year, as applicable to their graduation requirements.

Students approved for seven-semester graduation will receive their diploma at the school's regularly scheduled graduation ceremony.

PRINCIPLES OF BUSINESS MANAGEMENT • 4562 / BUS X100

Explore how businesses are managed—and learn what it takes to make smart business decisions!

What does it take to run a successful business? In this course, students will explore the role of business managers and learn how businesses operate in today's changing world. Topics will include business management, leadership, organization, decision-making, and business operations.

Students will examine how managers guide businesses through everyday challenges while considering the economic, political, and social factors that influence business decisions. Through real-world examples and business scenarios, students will gain a better understanding of how businesses operate, respond to change, and make decisions that affect employees, customers, and communities.

This course is a great choice for students interested in business, management, entrepreneurship, leadership, marketing, finance, or pursuing a career in the business world.

🎓 Dual Credit Opportunity: This is an Indiana University Bloomington dual credit course. Students may earn college credit while completing their high school coursework.

🏛️ Indiana College Core Connection: This course counts toward the Social and Behavioral Ways of Knowing category of the Indiana College Core (ICC).

Six-Semester Graduation

Students interested in graduating after **six semesters** must request consideration during the **second-semester scheduling process of their sophomore year**. Applications submitted after this deadline will not be considered.

To be eligible, students must:

- Complete all credits required for an Enrollment Honors Seal, Employment Honors Seal with a Credential of Value, or Enlistment Seal.
- If pursuing the Enlistment Seal, be at least 18 years old and formally enlisted in a branch of the U.S. Armed Forces.
- Earn a minimum 3.0 cumulative GPA.
- Meet required attendance expectations.
- Complete all Graduation Pathway requirements.
- Submit a completed Six-Semester Graduation Application.
- Submit a one- to two-page essay explaining why graduating early is important to them.
- Not be considered habitually absent or truant under Indiana Department of Education guidelines.
- Have no more than 10 absences in any school year during grades 9, 10, or 11.
- Complete English 11 during the summer between sophomore and junior year.
- Complete English 12 in the classroom during junior year.

All six-semester graduation applications require **administrative approval** before being submitted to the School Board for final approval or denial.

📌 Important

Early graduation is an option for students who can demonstrate that they are on track to meet the requirements of their selected **Indiana diploma and Graduation Seal**. Students should work closely with their school counselor to review their credits, pathway requirements, seal requirements, and post-graduation plans before applying.

CREDIT, GRADES, AND ACADEMIC POLICIES

PRINCIPLES OF BUSINESS MANAGEMENT • 4562 / BUS X100

Explore how businesses are managed—and learn what it takes to make smart business decisions!

What does it take to run a successful business? In this course, students will explore the role of business managers and learn how businesses operate in today's changing world. Topics will include business management, leadership, organization, decision-making, and business operations.

Students will examine how managers guide businesses through everyday challenges while considering the economic, political, and social factors that influence business decisions. Through real-world examples and business scenarios, students will gain a better understanding of how businesses operate, respond to change, and make decisions that affect employees, customers, and communities.

This course is a great choice for students interested in business, management, entrepreneurship, leadership, marketing, finance, or pursuing a career in the business world.

🎓 Dual Credit Opportunity: This is an Indiana University Bloomington dual credit course. Students may earn college credit while completing their high school coursework.

🏛️ Indiana College Core Connection: This course counts toward the Social and Behavioral Ways of Knowing category of the Indiana College Core (ICC).

Earning Credit

Most courses earn **1 credit per semester**. Exceptions include:

- **Central Nine:** 3–4 credits
- **Supervised Agriculture:** 1 credit per summer
- **Career Exploration/Capstone Courses:** 2 credits
- **Study Hall/Resource:** 0 credits

Attendance and Credit: Seven or more absences per semester may result in loss of credit.

Audits and Independent Study: Students may audit up to four classes. When a course is repeated, the higher grade replaces the lower grade. Independent Study requires teacher and counselor approval.

Grading System: A (100-93) B+ (89-87) C+ (79-77) D+ (69-67)
A- (92-90) B (86-83) C (76-73) D (66-63)
B- (82-80) C- (72-70) D- (62-60)

Semester grades: 40% Q1 + 40% Q2 + 20% Exam.

Semester Grades: Semester grades are calculated using the following weights:

- Quarter 1: 40%
- Quarter 2: 40%
- Semester Exam: 20%

GPA and Class Rank: Weighted courses receive one additional quality point. Class rank is updated each semester. Valedictorian and salutatorian are determined using eighth-semester GPA.

Incompletes: Incomplete grades must be completed within 10 days. All incompletes must be approved by the principal before the end of the semester.

Withdraw/Fail (WF): A WF counts as an F in the GPA. A WF may be assigned for either of the following reasons:

- A student is removed from a class for disciplinary reasons.
- A student withdraws from a class after the first 10 school days of the semester.

PRINCIPLES OF BUSINESS MANAGEMENT • 4562 / BUS X100

Explore how businesses are managed—and learn what it takes to make smart business decisions!

What does it take to run a successful business? In this course, students will explore the role of business managers and learn how businesses operate in today's changing world. Topics will include business management, leadership, organization, decision-making, and business operations.

Students will examine how managers guide businesses through everyday challenges while considering the economic, political, and social factors that influence business decisions. Through real-world examples and business scenarios, students will gain a better understanding of how businesses operate, respond to change, and make decisions that affect employees, customers, and communities.

This course is a great choice for students interested in business, management, entrepreneurship, leadership, marketing, finance, or pursuing a career in the business world.

🎓 **Dual Credit Opportunity: This is an Indiana University Bloomington dual credit course. Students may earn college credit while completing their high school coursework.**

🏛️ **Indiana College Core Connection: This course counts toward the Social and Behavioral Ways of Knowing category of the Indiana College Core (ICC).**

Report Cards: Report cards are issued four times per year and are available through Infinite Campus or Student Services. Academic concerns should be addressed with the course teacher or the Building-Based Support Team.

Graduation and Beyond

Graduation Requirements

Indiana diploma requirements vary by graduating cohort. Students in the **Classes of 2029–2031** should follow the diploma and Graduation Seal requirements that apply to their graduating class.

In addition to meeting the requirements of their selected diploma, students must complete the applicable Graduation Pathway, which includes three components:

- Meet the requirements of the selected diploma.
- Demonstrate employability skills.
- Demonstrate postsecondary readiness..

Students should work with their school counselor to confirm that their course selections meet current state and local graduation requirements.

Mathematics Sequences

Taking a planned sequence of math courses can help students prepare for college, technical school, and career opportunities. College admission requirements vary, so students should check the requirements of the colleges or programs they may want to attend.

Career and Technical Education

Indiana's Next Level Programs of Study (NLPS) pathways help students prepare for high-skill, high-wage careers and may include Work-Based Learning Capstone experiences.

Governor's Work Ethic Certification (GWEC): Students demonstrate the following employability skills:

- Integrity
- Motivation

PRINCIPLES OF BUSINESS MANAGEMENT • 4562 / BUS X100

Explore how businesses are managed—and learn what it takes to make smart business decisions!

What does it take to run a successful business? In this course, students will explore the role of business managers and learn how businesses operate in today's changing world. Topics will include business management, leadership, organization, decision-making, and business operations.

Students will examine how managers guide businesses through everyday challenges while considering the economic, political, and social factors that influence business decisions. Through real-world examples and business scenarios, students will gain a better understanding of how businesses operate, respond to change, and make decisions that affect employees, customers, and communities.

This course is a great choice for students interested in business, management, entrepreneurship, leadership, marketing, finance, or pursuing a career in the business world.

🎓 Dual Credit Opportunity: This is an Indiana University Bloomington dual credit course. Students may earn college credit while completing their high school coursework.

🏛️ Indiana College Core Connection: This course counts toward the Social and Behavioral Ways of Knowing category of the Indiana College Core (ICC).

- Professionalism
- Adaptability
- Communication
- Teamwork

Senior Requirements: A minimum 2.0 GPA, 98% attendance, no more than one behavior referral, and at least six service hours. Students should confirm current eligibility requirements with Student Services.

Testing and Postsecondary Planning

Testing: Students may participate in the following assessments, according to the school's testing schedule:

- **PSAT 8/9 and PSAT–NMSQT:** Grades 9–11, as applicable.
- **SAT:** Grade 11 for state accountability.
- **AP Exams:** Required for students enrolled in AP courses. The original guide lists a $99 Music Theory exam fee; confirm current fees with the school.

Postsecondary Options: Students may pursue a four-year or two-year college, technical school, military service, an apprenticeship, or direct entry into the workforce.

College Admissions Recommendations: As a general planning guideline, students should consider the following coursework:

- English: 4 years
- Math: 4 years
- Science: 3–4 years
- Social Studies: 3 years
- World Language: 2–3 years

Admission requirements vary by institution and program. Students should verify the requirements of the colleges or programs they are considering.

Applications and Transcripts

The Student Services Office can help students send their Indian Creek High School transcript through Parchment when applying to colleges or scholarships.

PRINCIPLES OF BUSINESS MANAGEMENT • 4562 / BUS X100

Explore how businesses are managed—and learn what it takes to make smart business decisions!

What does it take to run a successful business? In this course, students will explore the role of business managers and learn how businesses operate in today's changing world. Topics will include business management, leadership, organization, decision-making, and business operations.

Students will examine how managers guide businesses through everyday challenges while considering the economic, political, and social factors that influence business decisions. 🏛️ Indiana College Core Connection: This course counts toward the Social and Behavioral Ways of Knowing category of the Indiana College Core (ICC).

Students who have taken dual-credit courses must also request official college transcripts directly from Ivy Tech or Indiana University.

- **Ivy Tech:** Visit How to Order Transcripts for instructions.
- **Indiana University ACP:** Review the ACP Student Handbook section on Transcripts and Transferring Credits.

Letters of Recommendation: Students who need a letter of recommendation should complete a Senior Profile and give their teacher or counselor at least **7 days' notice**.

Athletic Eligibility: Students planning to participate in college athletics should review eligibility requirements and register with the appropriate organization:

- NCAA Eligibility Center
- NAIA Eligibility Center

Course Descriptions

NHJ Empower

Special Note: Each of these courses require an application and will be available online only. If approved, students and their parents will also sign a contract for participation in this program. These courses follow the same deadlines as any other ICHS course. **To be accepted into an Empower course, students and parents must attend a mandatory informational meeting, to be held after students submit their course requests.**

NHJ EMPOWER PHOTOGRAPHY • 4062

This **fully online course** gives students the opportunity to explore photography and digital imagery while developing their own creative style. Students will use a variety of digital tools to create photographs and videos while learning about photography techniques, composition, and the principles and elements of art.

PRINCIPLES OF BUSINESS MANAGEMENT • 4562 / BUS X100

Explore how businesses are managed—and learn what it takes to make smart business decisions!

What does it take to run a successful business? In this course, students will explore the role of business managers and learn how businesses operate in today's changing world. Topics will include business management, leadership, organization, decision-making, and business operations.

Students will examine how managers guide businesses through everyday challenges while considering the economic, political, and social factors that influence business decisions. Through real-world examples and business scenarios, students will gain a better understanding of how businesses operate, respond to change, and make decisions that affect employees, customers, and communities.

CAREER EXPLORATION INTERNSHIP • 0530

This course gives students the opportunity to learn about careers while gaining hands-on experience in a real workplace. Students may participate in a paid or unpaid internship in the public or private sector based on their career interests.

Unlike a traditional work program that focuses on one specific job, a Career Exploration Internship allows students to explore different parts of an industry or career field. Students may rotate through different departments, job roles, or work sites to get a broader understanding of what it's like to work in that field.

Students will also meet regularly with their teacher or participate in a seminar to connect what they are learning in school to their workplace experiences. Together with their teacher, parent/guardian, and employer, students will set learning goals and expectations for their internship.

This is a great opportunity to explore your interests, build workplace skills, make professional connections, and discover what careers might be a good fit for you.

OPEN TO:	Grades: 12
PREREQUISITES:	Must work a minimum of 180 hours per semester

YEAR ONE	YEAR TWO	YEAR THREE
Principles of Advanced Manufacturing	Advanced Manufacturing Technology	Industrial Maintenance Fundamentals

ADVANCED MANUFACTURING TECHNOLOGY • 7103

Discover how things are designed, built, and brought to life!

Ever wonder how products go from an idea to something you can actually use? In this course, students explore the **technology, tools, and processes used in today's manufacturing industry**.

Students will learn about **electrical, mechanical, and fluid power systems**, including current, voltage, resistance, power, circuits, transformers, and energy transfer. They will also explore machining, tooling, machine operation, and the technologies used to control modern production equipment.

The course covers the entire **product life cycle—from design and materials to production, quality control, and distribution**. Students will also learn how different types of manufacturing systems work and how technology is used to make production safer, faster, and more efficient.

This course is a great opportunity for students interested in **engineering, robotics, manufacturing, automation, skilled trades, or other technology-based careers**.

🏭 **Pathway Connection:** This course is **Year 2 of the Advanced Manufacturing Pathway** and builds on the skills and knowledge students developed in Year 1.

INDUSTRIAL MAINTENANCE FUNDAMENTALS • 7104

Build hands-on skills for careers in welding, machining, and the skilled trades!

This hands-on course introduces students to the **fundamentals of welding and machining**—skills used in many manufacturing, construction, maintenance, and skilled-trade careers.

Students will learn **safe welding and cutting practices**, including oxy-fuel and arc welding. They will also gain experience with **brazing and basic machine tools**, including turning, milling, and grinding equipment.

Through hands-on projects and practice, students will develop **practical skills, problem-solving abilities, and workplace safety habits** that can help prepare them for further training, apprenticeships, or careers in manufacturing and the skilled trades.

🏭 **Pathway Connection:** This course is **Year 3 of the Advanced Manufacturing Pathway** and builds on the skills and knowledge students developed in Year 1 and Year 2.

ANIMAL SCIENCE • 5008/ AGRI 103

Explore the science, care, and business behind animals and agriculture!

Interested in **animals, agriculture, veterinary science, or animal-related careers**? This yearlong course gives students an introduction to the animal science industry and explores both **large and small animals**.

Students will learn about **animal anatomy and physiology, genetics, reproduction, nutrition, common diseases and parasites, and proper animal care and management**. They will also explore the different products and resources we get from various animal species.

Throughout the course, students will learn how science and technology are used to improve animal health, production, and management. The class will also explore **current issues and topics affecting animal agriculture** and encourage students to think critically about the role animals play in our society.

This course is a great opportunity to **learn more about animals, build practical knowledge, and explore careers in animal science, veterinary medicine, agriculture, and related fields**.

🐄 **Pathway Connection:** This course is **Year 2 of the Agriscience: Animals Pathway** and builds on the foundational knowledge and skills students developed in Year 1.

PRINCIPLES OF BUSINESS MANAGEMENT • 4562 / BUS X100

Explore how businesses are managed—and learn what it takes to make smart business decisions!

What does it take to run a successful business? In this course, students will explore the role of business managers and learn how businesses operate in today's changing world. Topics will include business management, leadership, organization, decision-making, and business operations.

Students will examine how managers guide businesses through everyday challenges while considering the economic, political, and social factors that influence business decisions. Through real-world examples and business scenarios, students will gain a better understanding of how businesses operate, respond to change, and make decisions that affect employees, customers, and communities.

This course is a great choice for students interested in business, management, entrepreneurship, leadership, marketing, finance, or pursuing a career in the business world.

🎓 **Dual Credit Opportunity: This is an Indiana University Bloomington dual credit course. Students may earn college credit while completing their high school coursework.**

🏛️ **Indiana College Core Connection: This course counts toward the Social and Behavioral Ways of Knowing category of the Indiana College Core (ICC).**

🎓 **Ivy Tech Dual Credit:** Students have the opportunity to earn **Ivy Tech dual credit** while completing their high school coursework.

OPEN TO:	Grades: 10 - 12
PREREQUISITES:	Principles of Agriculture
FULL YEAR COURSE	

ADVANCED LIFE SCIENCE: ANIMALS • 5070/ AGRI 107

Dive deeper into the science, care, and future of animal agriculture!

This two-semester course gives students the opportunity to explore **animal science through hands-on activities and laboratory experiences**. Students will learn how animals are cared for, managed, and used in agriculture while exploring the science and technology behind the industry.

Topics include **animal welfare and husbandry, diseases and parasites, animal handling and housing, genetics and breeding, biotechnology, and animal anatomy and physiology**. Students will also explore laws and practices related to animal agriculture and examine how the industry impacts the environment.

Students will learn about **sustainable practices and the future of animal agriculture**, including how producers around the world are working to meet the needs of a growing population while responsibly caring for animals and natural resources.

This course is a great fit for students interested in **animals, veterinary science, agriculture, biotechnology, environmental science, or other animal-related careers**.

🐄 **Pathway Connection:** This course is **Year 3 of the Agriscience: Animals Pathway** and builds on the knowledge and skills students developed in Years 1 and 2.

PRINCIPLES OF BUSINESS MANAGEMENT • 4562 / BUS X100

Explore how businesses are managed—and learn what it takes to make smart business decisions!

What does it take to run a successful business? In this course, students will explore the role of business managers and learn how businesses operate in today's changing world. Topics will include business management, leadership, organization, decision-making, and business operations.

Students will examine how managers guide businesses through everyday challenges while considering the economic, political, and social factors that influence business decisions. ADVANCED LIFE SCIENCE: PLANTS • 5074/ AGRI 109

Discover how plants grow, thrive, and support life!

This two-semester course gives students the opportunity to explore the **science behind plants and soil** through hands-on activities, laboratory experiments, and fieldwork.

Students will learn how plants are **classified, grow, function, and reproduce**, while exploring topics such as **plant genetics, evolution, and the ways humans use plants**. Students will also investigate how plants interact with their environment and the important role they play in ecosystems.

Through laboratory and field experiences, students will discover **how soil affects plant growth and how agricultural and horticultural practices help plants thrive**.

This course is a great fit for students interested in **agriculture, horticulture, environmental science, landscaping, plant science, or other careers involving plants and natural resources**.

🌱 **Pathway Connection:** This course is **Year 3 of the Agriscience: Plants Pathway** and builds on the knowledge and skills students developed in Years 1 and 2.

PRINCIPLES OF BUSINESS MANAGEMENT • 4562 / BUS X100

Explore how businesses are managed—and learn what it takes to make smart business decisions!

What does it take to run a successful business? In this course, students will explore the role of business managers and learn how businesses operate in today's changing world. Topics will include business management, leadership, organization, decision-making, and business operations.

Students will examine how managers guide businesses through everyday challenges while considering the economic, political, and social factors that influence business decisions. Through real-world examples and business scenarios, students will gain a better understanding of how businesses operate, respond to change, and make decisions that affect employees, customers, and communities.

FULL YEAR COURSE	

AGRICULTURE POWER, STRUCTURE AND TECHNOLOGY • 5088/ AGRI 106

Build real-world skills and explore careers in agriculture and skilled trades!

This yearlong, **hands-on shop course** gives students the opportunity to learn practical skills used in agriculture, construction, and skilled-trade careers. Students will learn **hand tool safety and identification, electricity, plumbing, carpentry, and concrete work**, with a strong focus on working safely and responsibly.

Students will also get a closer look at **metalworking and welding**, as well as other technologies used in modern agriculture. Additional topics include **small engines, agricultural equipment, and career opportunities** in agriculture power, structures, and technology.

Students will explore **college, technical training, and other options after high school**, while gaining experience through a supervised agricultural experience.

This course is a great fit for students who enjoy **building, fixing, creating, working with tools, and learning by doing** and are interested in careers in agriculture, construction, welding, mechanics, or skilled trades.

🚜 **Pathway Connection:** This course is **Year 2 of the Agriculture Mechanical & Engineering Pathway** and builds on the foundational knowledge and skills students developed in Year 1.

PRINCIPLES OF BUSINESS MANAGEMENT • 4562 / BUS X100

Explore how businesses are managed—and learn what it takes to make smart business decisions!

What does it take to run a successful business? In this course, students will explore the role of business managers and learn how businesses operate in today's changing world. Topics will include business management, leadership, organization, decision-making, and business operations.

Students will examine how managers guide businesses through everyday challenges while considering the economic, political, and social factors that influence business decisions. PLANT AND SOIL SCIENCE • 5170/ AGRI 105

Get hands-on and discover how plants and soil work together!

This yearlong course introduces students to the basics of **plant and soil science** through classroom learning and hands-on activities. Students may work in the greenhouse and explore areas around the school as they put what they learn into practice.

Students will explore topics such as **how soil is formed and used, soil conservation and drainage, plant growth and reproduction, plant classification, fertilizers, and environmental factors that affect plants and soil**. Students will also learn about **soil erosion and ways to protect and improve soil health**.

Along the way, students will discover how plant and soil science connects to everyday life and explore **career opportunities in agriculture, horticulture, landscaping, environmental science, and related fields**.

This course is a great choice for students who enjoy **working with plants, being outdoors, learning through hands-on activities, and exploring agriculture and environmental science**.

PRINCIPLES OF BUSINESS MANAGEMENT • 4562 / BUS X100

PRINCIPLES OF AGRICULTURE • 7117 / AGRI 100 & 102

Discover the many ways agriculture impacts our world!

This two-semester course introduces students to the **wide variety of careers, industries, and opportunities within agriculture and agribusiness**. Students will explore how agriculture affects our everyday lives and plays an important role in communities across the United States and around the world.

Students will explore a variety of agricultural areas, including **animals, plants, food and natural resources, agricultural power and equipment, structures, technology, and agribusiness**. Along the way, students will learn about the people, businesses, and technologies that help produce the food, products, and resources we use every day.

Students will also explore **career opportunities in agriculture** and discover the many pathways available in this growing industry.

Principles of Agriculture is the starting course for the NLPS graduation pathway for agricultural programs and is a great choice for students who want to explore the many possibilities within agriculture.

🌱 **Pathway Connection:** This course is the **first course in all Agriculture pathways** and provides students with the foundational knowledge and skills they will build on in future agriculture courses.

🎓 **Ivy Tech Dual Credit:** Students have the opportunity to earn **Ivy Tech dual credit** while completing their high school coursework.

Explore how businesses are managed—and learn what it takes to make smart business decisions!

What does it take to run a successful business? In this course, students will explore the role of business managers and learn how businesses operate in today's changing world. Topics will include business management, leadership, organization, decision-making, and business operations.

Students will examine how managers guide businesses through everyday challenges while considering the economic, political, and social factors that influence business decisions. Through real-world examples and business scenarios, students will gain a better understanding of how businesses operate, respond to change, and make decisions that affect employees, customers, and communities.

This course is a great choice for students interested in business, management, entrepreneurship, leadership, marketing, finance, or pursuing a career in the business world.

🎓 Dual Credit Opportunity: This is an Indiana University Bloomington dual credit course. Students may earn college credit while completing their high school coursework.

🏛️ Indiana College Core Connection: This course counts toward the Social and Behavioral Ways of Knowing category of the Indiana College Core (ICC).

Students will investigate topics such as **data science, artificial intelligence, app and game development, and cybersecurity**. They will learn how these technologies are used in the real world and explore the skills professionals use to design, build, and protect digital solutions.

Students will apply their programming and problem-solving skills through **hands-on projects and authentic challenges**. They will have opportunities to create solutions, experiment with technology, and use what they learn to solve problems in creative ways.

This course is a great choice for students interested in **computer science, artificial intelligence, cybersecurity, data science, programming, app development, game design, or other technology-related careers.**

💻 **Pathway Connection: This course is Year 2 of the Computer Science Pathway and builds on the foundational knowledge and skills students developed in Year 1.**

OPEN TO:	Grades:10-12
PREREQUISITES:	Principles of Computing
FULL YEAR COURSE	

COMPUTER SCIENCE • 7352

Learn to code, solve problems, and build the skills behind today's technology!

Ready to learn how computer programs are created? This course introduces students to the **fundamentals of programming** and gives them a strong foundation in computer science.

Students will learn how to write and organize programs using **data types, control structures, functions, arrays, and files**. They will also practice running, testing, and debugging programs to find problems, improve their code, and create solutions that work.

PRINCIPLES OF BUSINESS MANAGEMENT • 4562 / BUS X100

Explore how businesses are managed—and learn what it takes to make smart business decisions!

What does it take to run a successful business? In this course, students will explore the role of business managers and learn how businesses operate in today's changing world. Topics will include business management, leadership, organization, decision-making, and business operations.

🏛️ **Indiana College Core Connection: This course counts toward the Social and Behavioral Ways of Knowing category of the Indiana College Core (ICC).**

Ready to take your construction skills to the next level? This hands-on course gives students the opportunity to develop advanced framing and finishing skills used in residential and commercial construction.

Students will learn how to complete important construction projects, including roofing, exterior finishes, drywall installation and finishing, doors and hardware, suspended ceilings, and trim work. They will also explore cold-formed steel framing and learn techniques used to create strong, finished structures.

Students will gain practical experience installing windows, doors, floor and ceiling trim, and cabinets while developing skills in measuring, planning, using tools safely, and paying attention to detail.

This course is a great choice for students who enjoy building, working with their hands, solving problems, and creating something they can see and use. It can also help prepare students for careers in construction, carpentry, remodeling, finish work, and the skilled trades.

🏗️ **Pathway Connection: This course is Year 2 of the Construction Trades Pathway and is taken along with Technical Math. It builds on the foundational knowledge and skills students developed in Year 1.**

OPEN TO:	Grades: 11-12
PREREQUISITES:	None
FULL YEAR COURSE	

CONSTRUCTION TRADES: GENERAL CARPENTRY • 7123

Learn the skills, tools, and knowledge you need to get started in the construction industry!

PRINCIPLES OF BUSINESS MANAGEMENT • 4562 / BUS X100

Explore how businesses are managed—and learn what it takes to make smart business decisions!

What does it take to run a successful business? In this course, students will explore the role of business managers and learn how businesses operate in today's changing world. Topics will include business management, leadership, organization, decision-making, and business operations.

Students will examine how managers guide businesses through everyday challenges while considering the economic, political, and social factors that influence business decisions. Through real-world examples and business scenarios, students will gain a better understanding of how businesses operate, respond to change, and make decisions that affect employees, customers, and communities.

AMERICAN LITERATURE • 1020

PRINCIPLES OF BUSINESS MANAGEMENT • 4562 / BUS X100

Explore how businesses are managed—and learn what it takes to make smart business decisions!

What does it take to run a successful business? In this course, students will explore the role of business managers and learn how businesses operate in today's changing world. Topics will include business management, leadership, organization, decision-making, and business operations.

Students will examine how managers guide businesses through everyday challenges while considering the economic, political, and social factors that influence business decisions. Through real-world examples and business scenarios, students will gain a better understanding of how businesses operate, respond to change, and make decisions that affect employees, customers, and communities.

This course is a great choice for students interested in business, management, entrepreneurship, leadership, marketing, finance, or pursuing a career in the business world.

🎓 **Dual Credit Opportunity: This is an Indiana University Bloomington dual credit course. Students may earn college credit while completing their high school coursework.**

🏛️ **Indiana College Core Connection: This course counts toward the Social and Behavioral Ways of Knowing category of the Indiana College Core (ICC).**

Explore the stories, voices, and ideas that have shaped the United States! In American Literature, you'll read a variety of works from different time periods and genres, including novels, short stories, poetry, essays, and other forms of media.

You'll analyze and discuss what you read, consider different perspectives, and connect literature to American history, culture, and current society. You'll also explore how authors reflect the experiences, challenges, values, and ideas that have helped shape the United States.

Throughout the course, you'll strengthen your reading, writing, critical-thinking, and communication skills while discovering how literature can help us better understand both the past and the world we live in today.

📚 **English Requirement:** American Literature counts as an **English credit and fulfills an English requirement for all Indiana diploma types**.

OPEN TO:	Grades 11 - 12
PREREQUISITES:	None
ONE SEMESTER COURSE	Second semester only course.

CLASSICAL LITERATURE (HISTORICAL LITERATURE) • 1026

Explore classic and historical literature while discovering themes and ideas that continue to connect to our lives today. In this course, students will read a variety of fiction and nonfiction works and examine the historical and cultural settings in which they were written.

Through class discussions, independent reading, and research, students will explore universal themes, analyze different perspectives, and consider how literature reflects the growth and experiences of society. Students will also complete independent research projects and readings that prepare them to create written papers and presentations.

PRINCIPLES OF BUSINESS MANAGEMENT • 4562 / BUS X100

Explore stories, perspectives, and experiences from a variety of cultural backgrounds. In Ethnic Literature, students will read works by authors from diverse ethnic cultures and examine how literature reflects identity, history, traditions, and lived experiences.

Students will explore themes and issues that are important to different cultural groups and consider how these experiences connect to larger national and historical events. Through reading, discussion, writing, and analysis, students will develop a deeper understanding of different perspectives while exploring the ways literature can shape our understanding of culture and society.

📚 **English Requirement:** Ethnic Literature counts as an **English credit and fulfills an English requirement for all Indiana diploma types**.

OPEN TO:	Grades 11 - 12
PREREQUISITES:	None
ONE SEMESTER COURSE	First semester only course.

FILM LITERATURE (HOLOCAUST) • 1034:

Explore how the Holocaust has been portrayed and remembered through film and other forms of storytelling. In this course, students will view and analyze films that address the Holocaust while examining historical events, individual experiences, and different perspectives.

Students will conduct independent research and complete readings to deepen their understanding of the Holocaust and evaluate how filmmakers present historical events. Through class discussions, written assignments, research projects, and presentations, students will develop critical-thinking skills while exploring the connections between history, literature, and film.

PRINCIPLES OF BUSINESS MANAGEMENT • 4562 / BUS X100

Explore how businesses are managed—and learn what it takes to make smart business decisions!

WORLD LITERATURE (MYTHOLOGY) • 1052

Step into the fascinating world of myths, legends, heroes, and gods! In this course, students will explore mythology from a variety of cultures, including Greek and Roman, Celtic, Norse, Native American, and modern traditions.

Through reading, research, and discussion, students will discover how different cultures use myths to explain the world, explore human experiences, and pass down beliefs and traditions. Students will analyze mythological stories through both analytical and creative writing, including opportunities to create original pieces inspired by the styles and themes they study. Students will also share their learning through presentations throughout the semester.

📚 **English Requirement:** World Mythology counts as an **English credit and fulfills an English requirement for all Indiana diploma types**.

OPEN TO:	Grades 11 - 12
PREREQUISITES:	
FIRST SEMESTER COURSE	First semester course only.

ETYMOLOGY • 1060

Ever wonder where words come from—or why they mean what they do? In Etymology, students will become word detectives as they explore the origins and history of the English language. Students will discover how English words have developed from ancient and modern languages, including Latin, Greek, Germanic, and Romance languages.

Students will learn how roots, prefixes, and suffixes can help unlock the meaning of unfamiliar words and expand their vocabulary. They will also explore how words change over time and how the meaning of a word can change depending on how it is used.

PRINCIPLES OF BUSINESS MANAGEMENT • 4562 / BUS X100

Explore how businesses are managed—and learn what it takes to make smart business decisions!

What does it take to run a successful business? In this course, students will explore the role of business managers and learn how businesses operate in today's changing world. Topics will include business management, leadership, organization, decision-making, and business operations.

Principles of Hospitality	Nutrition	Culinary Arts

INTERIOR DESIGN FUNDAMENTALS • 7127

Turn your creativity into real-world design skills! Interior Design Fundamentals is the **second course in the Interior Design pathway** and gives students a deeper look at how designers create spaces that are functional, comfortable, and visually appealing.

Students will learn how to **plan and analyze spaces, arrange and select furniture, choose materials and finishes, and create professional design presentations** based on the needs of the people using a space. Students will also explore the basics of residential construction, building structures, construction materials, and reading floor plans and other building drawings.

As students develop their design skills, they will explore **building codes, sustainable design practices, construction techniques, site planning, and digital or hand-rendered design drawings**. Hands-on projects will give students opportunities to apply what they learn and develop skills used by professionals in interior design, architecture, construction, and related careers.

Whether you enjoy **creativity, design, problem-solving, or working with spaces**, this course provides a great opportunity to build practical skills and continue exploring careers in the design and construction industries.

PRINCIPLES OF BUSINESS MANAGEMENT • 4562 / BUS X100

🏠 **Pathway Connection:** This course is **Year 2 of the Interior Design Pathway** and builds on the foundational knowledge and skills students developed in Year 1.

OPEN TO:	Grades: 10-12
PREREQUISITES:	Principles of Interior Design
FULL YEAR COURSE	

MATERIALS, FINISHES, AND DESIGN • 7128

Discover how materials and finishes bring a space to life! As the **third course in the Interior Design pathway**, Materials, Finishes, and Design gives students hands-on knowledge of the materials, textiles, furniture, and design details used to create beautiful, functional spaces.

Students will explore the **characteristics, uses, durability, and sustainability** of a wide variety of materials and finishes. A major focus of the course is textiles, where students will learn about different fiber sources, identify and classify fabrics, and explore how textiles are selected based on their appearance, function, and environmental impact.

Students will apply what they learn to interior design applications such as **window treatments, upholstery, carpeting, and wall coverings**. They will also explore how designers select, estimate, and install materials while considering environmental concerns, sustainability, cost, and the needs of the space.

Through projects and hands-on activities, students will build practical skills that can be used in **interior design, architecture, construction, furniture, textiles, and other design-related careers**.

🏠 **Pathway Connection:** This course is **Year 3 of the Interior Design Pathway** and builds on the knowledge and skills students developed in Years 1 and 2.

OPEN TO:	Grades: 11-12

FULL YEAR COURSE	

PRINCIPLES OF INTERIOR DESIGN • 7132

Discover how color, creativity, and design can transform a space! Principles of Interior Design is the first course in the Interior Design pathway and introduces students to the fundamentals of interior design and the principles that help create spaces that are functional, comfortable, and visually appealing.

Students will explore design theory, color, composition, and the psychology of space while learning how design choices can influence the way people feel and interact with their surroundings. They will apply these concepts to three-dimensional design projects and explore how human needs, culture, and social influences can shape a space.

Through hands-on activities and design projects, students will develop creative problem-solving, communication, presentation, and peer-evaluation skills. Students will have opportunities to share their ideas, receive feedback, and refine their designs.

Whether you're interested in interior design, architecture, construction, art, or simply enjoy being creative, this course is a great starting point for exploring the exciting world of design.

🏠 **Pathway Connection: This course is the first course in the Interior Design Pathway and provides students with the foundational knowledge and skills they will build on in future courses.**

PREREQUISITES:	None
FULL YEAR COURSE	

PRINCIPLES OF BUSINESS MANAGEMENT • 4562 / BUS X100

Explore how businesses are managed—and learn what it takes to make smart business decisions!

What does it take to run a successful business? In this course, students will explore the role of business managers and learn how businesses operate in today's changing world. Topics will include business management, leadership, organization, decision-making, and business operations.

Students will examine how managers guide businesses through everyday challenges while considering the economic, political, and social factors that influence business decisions. Through real-world examples and business scenarios, students will gain a better understanding of how businesses operate, respond to change, and make decisions that affect employees, customers, and communities.

This course is a great choice for students interested in business, management, entrepreneurship, leadership, marketing, finance, or pursuing a career in the business world.

🎓 **Dual Credit Opportunity: This is an Indiana University Bloomington dual credit course. Students may earn college credit while completing their high school coursework.**

🏛️ **Indiana College Core Connection: This course counts toward the Social and Behavioral Ways of Knowing category of the Indiana College Core (ICC).**

CHILD AND ADOLESCENT DEVELOPMENT • 7157/ EDUC 121

Ever wonder why children think, learn, and grow the way they do? Child and Adolescent Development is the **second course in the Teaching pathway** and can also be taken as an **elective course** by students who are interested in working with children, education, psychology, healthcare, or other people-focused careers.

Students will explore how children develop from **birth through adolescence**, with a focus on the middle years through the teenage years. Topics include **physical, social, emotional, cognitive, and moral development**, as well as the biological and environmental factors that influence growth and learning.

Students will explore major child-development theories and examine how **parents, peers, schools, culture, technology, and media** can influence a child's development. Through observation and interviewing activities, students will have opportunities to connect what they learn in class to real-world experiences. An observation experience of up to **20 hours may be required**.

🎓 **Dual Credit Opportunity:** This course is approved for **Ivy Tech dual credit**. Students pursuing dual credit must meet Ivy Tech's course prerequisites and earn a **C or better** in the course to receive college credit.

📚 **Elective Option:** Students do not have to be pursuing the Teaching pathway to take this course—it can also be taken as an **elective**.

🍎 **Pathway Connection:** This course is **Year 2 of the Teaching Pathway** and builds on the foundational knowledge and skills students developed in Year 1.

OPEN TO:	Grades 10 - 12

Together, these courses give students a strong foundation in healthcare knowledge, skills, and career exploration.

Students will explore healthcare careers and develop foundational skills used in a variety of health science settings. Topics may include **patient care, nursing, dental care, animal care, medical laboratory services, public**

PRINCIPLES OF BUSINESS MANAGEMENT • 4562 / BUS X100

Explore how businesses are managed—and learn what it takes to make smart business decisions!

What does it take to run a successful business? In this course, students will explore the role of business managers and learn how businesses operate in today's changing world. Topics will include business management, leadership, organization, decision-making, and business operations.

Students will examine how managers guide businesses through everyday challenges while considering the economic, political, and social factors that influence business decisions. Through real-world examples and business scenarios, students will gain a better understanding of how businesses operate, respond to change, and make decisions that affect employees, customers, and communities.

This course is a great choice for students interested in business, management, entrepreneurship, leadership, marketing, finance, or pursuing a career in the business world.

🎓 **Dual Credit Opportunity: This is an Indiana University Bloomington dual credit course. Students may earn college credit while completing their high school coursework.**

🏛️ **Indiana College Core Connection: This course counts toward the Social and Behavioral Ways of Knowing category of the Indiana College Core (ICC).**

health, and healthcare systems. Students will learn how healthcare professionals work together to provide safe, effective, and compassionate care.

Through hands-on lab experiences and career-focused activities, students will have opportunities to practice skills related to their areas of interest while developing **communication, teamwork, professionalism, problem-solving, and patient-care skills**. The course is designed to help students connect classroom learning to real-world healthcare careers.

🏥 **Pathway Connection:** This course is **Year 1 of the Pre-Nursing Pathway** and is taken **along with Healthcare Fundamentals**.

📝 **Application & Interview Required:** Students interested in the Pre-Nursing pathway must **complete an application and participate in an interview** as part of the selection process. **Only 10 students will be selected** for the Pre-Nursing pathway.

🎓 **Ivy Tech Dual Credit:** Students have the opportunity to earn **Ivy Tech dual credit** while completing their high school coursework.

🩺 **Pathway Requirement:** Students must be **accepted into the Pre-Nursing pathway program** to enroll in this course.

OPEN TO:	10
PREREQUISITES:	Application based. Combined with healthcare fundamentals.

Health and Physical Education Department

HEALTH & WELLNESS • 3506

In this course, students explore topics that help them make informed decisions and build healthy habits for life. Topics include growth and development, mental and emotional health, nutrition, family life, personal health, consumer health, alcohol, tobacco and other drugs, injury prevention, environmental health, and disease prevention.

Students learn how everyday choices affect their overall health and quality of life. Through technology, hands-on activities, and class discussions, they develop health literacy skills and learn to take responsibility for their personal health and wellness.

Course Requirements: Students will complete a semester research project on a health topic of interest. The project includes a written report, a visual presentation, and an oral presentation. A written final exam is also required. All coursework aligns with Indiana's state health education standards.

🎓 Graduation Requirement: This course is required for graduation.

OPEN TO:	Grades: 8 - 12
PREREQUISITES:	None
ONE SEMESTER COURSE	

PRINCIPLES OF BUSINESS MANAGEMENT • 4562 / BUS X100

Explore how businesses are managed—and learn what it takes to make smart business decisions!

APPLIED HEALTH & WELLNESS • 3506A

In this course, students learn how to make healthy choices and develop habits that support lifelong health and wellness. Topics include personal health, physical activity, nutrition, safety and injury prevention, mental and emotional health, tobacco and drug prevention, human development, and family health.

Students explore how their choices, values, and surroundings influence their health. Through class activities, discussions, and hands-on learning, they develop practical skills in decision-making, goal-setting, communication, finding reliable health information, and maintaining healthy habits. Students also learn how to reduce health risks, build healthy relationships, and encourage others to make healthy choices.

All coursework aligns with Indiana's Academic Standards for Health and Wellness.

🎓 Alternate Diploma: This course is available only to students working toward an alternate diploma.

OPEN TO:	Grades: 9 - 12
APPLIED UNITS:	2 units maximum
ONE SEMESTER COURSE	Counts as an elective or health & Wellness requirement for the Alternate Diploma.

PHYSICAL EDUCATION I • 3542

Get moving, build your skills, and discover activities you can enjoy for a lifetime! This course focuses on health-related fitness and helps students develop the skills, knowledge, and healthy habits needed to stay active throughout their lives.

PRINCIPLES OF BUSINESS MANAGEMENT • 4562 / BUS X100

Explore how businesses are managed—and learn what it takes to make smart business decisions!

What does it take to run a successful business? In this course, students will explore the role of business managers and learn how businesses operate in today's changing world. Topics will include business management, leadership, organization, decision-making, and business operations.

Students will examine how managers guide businesses through everyday challenges while considering the economic, political, and social factors that influence business decisions. Through real-world examples and business scenarios, students will gain a better understanding of how businesses operate, respond to change, and make decisions that affect employees, customers, and communities.

This course is a great choice for students interested in business, management, entrepreneurship, leadership, marketing, finance, or pursuing a career in the business world.

🎓 Dual Credit Opportunity: This is an Indiana University Bloomington dual credit course. Students may earn college credit while completing their high school coursework.

🏛️ Indiana College Core Connection: This course counts toward the Social and Behavioral Ways of Knowing category of the Indiana College Core (ICC).

Students will participate in a variety of activities designed to improve cardiorespiratory endurance, muscular strength and endurance, flexibility, and body composition. Depending on the course schedule, activities may include aerobic exercise, team sports, individual and dual sports, outdoor activities, aquatics, and recreational games.

Students will develop skills, learn rules and strategies, and participate in both individual and group activities. Fitness activities are incorporated regularly, including a daily mile run, along with other physical activities and fitness assessments. Some units will also include written tests and assignments.

Students are evaluated through both written assessments and performance-based activities. Grades may include:

- Participation and effort
- Attitude and sportsmanship
- Behavior and cooperation
- Dressing appropriately and being prepared for class
- Performance on fitness and skill assessments
- Written tests and assignments

Students are expected to participate regularly and come prepared for class. Excessive absences or consistently choosing not to participate in activities may affect a student's grade.

🏃 Final Assessment: The final assessment includes a timed mile run. The required time will be announced by the instructor. Students who are unable to complete the run may have the option of completing a written assessment, as determined by the instructor.

🏃 **PE Credit: This course may be taken to fulfill the 1 physical education credit required for graduation.**

OPEN TO:	Grades: 9 - 12

APPLIED PHYSICAL EDUCATION I • 3542A

Get active, build confidence, and discover activities you can enjoy for a lifetime! Adapted Physical Education is designed to help students develop physical fitness, movement skills, and healthy habits through activities that are matched to their individual needs and abilities.

Students will participate in a variety of physical activities, with opportunities to explore at least four areas such as **team sports, dual sports, individual activities, outdoor activities, self-defense and martial arts, aquatics, gymnastics, and dance**. Activities focus on building skills that students can use both in school and throughout their lives.

The course emphasizes **participation, personal progress, fitness, teamwork, confidence, and lifelong physical activity**. Students will work toward individual goals and have opportunities to build their skills through supportive, hands-on activities.

📋 **Assessment:** Student progress is evaluated throughout the course through **individual progress, participation, and performance-based skill assessments**.

🎓 **Alternate Diploma Requirement:** This course is available **only to students who are working toward the Indiana Alternate Diploma**.

OPEN TO:	Grades: 9 - 12
APPLIED UNITS:	2 units maximum
FULL YEAR COURSE	Counts as a physical education requirement for the Alternate Diploma.

APPLIED PHYSICAL EDUCATION II • 3544A

In this course, students build on the skills learned in Physical Education I while exploring new physical activities and ways to stay active. Students participate in a variety of activities, which may include team sports, individual and dual sports, outdoor activities, self-defense and martial arts, aquatics, gymnastics, and dance.

Through participation and practice, students develop physical skills, improve fitness, learn teamwork, and explore activities they can enjoy throughout their lives. Student progress is assessed through individual improvement, participation, and skill performance.

🎓 Alternate Diploma: This course is available only to students working toward an alternate diploma.

OPEN TO:	Grades: 9 - 12
APPLIED UNITS:	2 units maximum
FULL YEAR COURSE	Counts as a physical education requirement for the Alternate Diploma.

ELECTIVE PHYSICAL EDUCATION (APC) • 3560:

In this course, student-athletes focus on improving strength, endurance, speed, and overall athletic performance. Students use the weight room to build muscular strength and endurance while learning proper lifting techniques and safe equipment use. Conditioning activities include running, plyometrics, and other exercises designed to improve athletic performance. Students also learn about nutrition and how healthy eating habits support training, recovery, and success in sports.

🏅 Eligibility: This course is available only to Indian Creek High School athletes.

🏃 **PE Credit:** This course may be taken to fulfill the **1 physical education credit required for graduation**.

PRINCIPLES OF BUSINESS MANAGEMENT • 4562 / BUS X100

Explore how businesses are managed—and learn what it takes to make smart business decisions!

What does it take to run a successful business? In this course, students will explore the role of business managers and learn how businesses operate in today's changing world. Topics will include business management, leadership, organization, decision-making, and business operations.

Students will examine how managers guide businesses through everyday challenges while considering the economic, political, and social factors that influence business decisions. ELECTIVE PHYSICAL EDUCATION (AQUATICS) • 3560:

In this course, students develop water safety skills and build confidence in and around the water. Students learn and practice survival swimming strokes, including freestyle, elementary backstroke, and sidestroke. They also develop skills in floating, treading water, and moving efficiently through the water.

Through aquatic games and activities, students strengthen their swimming abilities while building teamwork, communication, and confidence. The course emphasizes water safety, personal responsibility, and skills that can be used throughout life.

🏃 **PE Credit:** This course may be taken to fulfill the **1 physical education credit required for graduation**.

OPEN TO:	Grades: 9-12
PREREQUISITES:	
ONE SEMESTER COURSE	

ELECTIVE PHYSICAL EDUCATION (PILATES) • 3560

In this course, students focus on improving physical fitness, flexibility, strength, balance, and mental wellness through Pilates, stretching, and breathing exercises. Students participate in low-impact workouts designed to reduce stress, improve body awareness, and promote relaxation.

PRINCIPLES OF BUSINESS MANAGEMENT • 4562 / BUS X100

Explore how businesses are managed—and learn what it takes to make smart business decisions!

What does it take to run a successful business? In this course, students will explore the role of business managers and learn how businesses operate in today's changing world. Topics will include business management, leadership, organization, decision-making, and business operations.

Students will examine how managers guide businesses through everyday challenges while considering the economic, political, and social factors that influence business decisions. Through mindfulness activities and guided movement, students learn techniques to manage stress, develop a positive mindset, and build healthy habits they can use in everyday life.

🏃 **PE Credit:** This course may be taken to fulfill the **1 physical education credit required for graduation**.

OPEN TO:	Grades: 9-12
PREREQUISITES:	
ONE SEMESTER COURSE	

ELECTIVE PHYSICAL EDUCATION (LIFETIME FITNESS) • 3560

Lifetime Physical Education gives students the opportunity to stay active, have fun, build social skills, and explore activities they can enjoy throughout their lives. Unlike traditional PE classes that focus on structured units and competitive sports, this course emphasizes choice, creativity, teamwork, and fitness in a relaxed, less competitive environment.

Students participate in a variety of recreational activities, including Spikeball, Four Square, Ultimate Frisbee, volleyball, pickup basketball, kickball, walking, stretching, and other fun movement-based activities. Students will rotate between teacher-led activities and free-choice options, allowing them to try new games and choose activities that interest them.

This course is ideal for students who want to stay active, reduce stress, build teamwork skills, and develop a positive attitude toward lifelong fitness without the pressure of competitive sports.

🏃 **PE Credit:** This course may be taken to fulfill the **1 physical education credit required for graduation**.

OPEN TO:	Grades: 9 - 12

ELECTIVE PHYSICAL EDUCATION (WALK, JOG, RUN) • 3560

This course helps students improve cardiovascular endurance, overall fitness, and lifelong wellness through walking, jogging, running, and other cardio-based activities. Designed for students of all fitness and experience levels, the course focuses on personal progress, setting individual goals, and building healthy habits rather than competition or athletic ability.

Students participate in a variety of activities, including walking and running workouts, interval training, fitness circuits, and conditioning exercises. They learn proper warm-up and cool-down techniques, pacing, walking and running form, and ways to track their fitness progress.

Through indoor and outdoor activities, students work toward improving endurance, building fitness, reducing stress, and understanding how regular physical activity supports both physical and mental well-being. The course encourages students to find enjoyable ways to stay active and maintain a healthy lifestyle throughout their lives.

🏃 **PE Credit:** This course may be taken to fulfill the **1 physical education credit required for graduation**.

OPEN TO:	Grades: 9 - 12
APPLIED UNITS:	8 units maximum
ONE SEMESTER COURSE	Counts as the Health & Wellness requirement for the Alternate Diploma.

Math Department

ALGEBRA I • 2520

In Algebra I, students build on their middle school math skills and learn how to use algebra to solve problems and understand mathematical relationships. Topics include linear equations and inequalities, functions, systems of equations, quadratic equations, and polynomial expressions.

PRINCIPLES OF BUSINESS MANAGEMENT • 4562 / BUS X100

Explore how businesses are managed—and learn what it takes to make smart business decisions!

What does it take to run a successful business? In this course, students will explore the role of business managers and learn how businesses operate in today's changing world. Topics will include business management, leadership, organization, decision-making, and business operations.

Students will examine how managers guide businesses through everyday challenges while considering the economic, political, and social factors that influence business decisions. Through real-world examples and business scenarios, students will gain a better understanding of how businesses operate, respond to change, and make decisions that affect employees, customers, and communities.

This course is a great choice for students interested in business, management, entrepreneurship, leadership, marketing, finance, or pursuing a career in the business world.

🎓 Dual Credit Opportunity: This is an Indiana University Bloomington dual credit course. Students may earn college credit while completing their high school coursework.

🏛️ Indiana College Core Connection: This course counts toward the Social and Behavioral Ways of Knowing category of the Indiana College Core (ICC).

Students explore linear and exponential relationships, analyze patterns in data, and learn different strategies for solving equations and working with quadratic functions. Through problem-solving activities and real-world applications, students develop critical-thinking skills and learn to recognize how algebra can be used in everyday situations and future math courses.

🎓 Graduation Requirement: This course is required for graduation.

OPEN TO:	Grades: 9 - 12
PREREQUISITES:	None
FULL YEAR COURSE	

APPLIED ALGEBRA I • 2520A

In this course, students build on their middle school math skills while learning practical algebra concepts. Topics include number sense, mathematical expressions, computation, linear equations and inequalities, functions, systems of equations, and introductory quadratic and exponential equations.

Through guided instruction, practice, and problem-solving activities, students develop skills for working with numbers, recognizing patterns, solving equations, and understanding mathematical relationships. The course follows Indiana's Algebra I Content Connectors and focuses on building foundational math skills for everyday life and future learning.

🎓 Alternate Diploma: This course is available only to students working toward an alternate diploma.

OPEN TO:	Grades: 9 - 12
APPLIED UNITS:	4 units maximum
FULL YEAR COURSE	Counts as a math requirement for the Alternate Diploma.

PRINCIPLES OF BUSINESS MANAGEMENT • 4562 / BUS X100

Explore how businesses are managed—and learn what it takes to make smart business decisions!

What does it take to run a successful business? In this course, students will explore the role of business managers and learn how businesses operate in today's changing world. Topics will include business management, leadership, organization, decision-making, and business operations.

Students will examine how managers guide businesses through everyday challenges while considering the economic, political, and social factors that influence business decisions. Through real-world examples and business scenarios, students will gain a better understanding of how businesses operate, respond to change, and make decisions that affect employees, customers, and communities.

This course is a great choice for students interested in business, management, entrepreneurship, leadership, marketing, finance, or pursuing a career in the business world.

🎓 Dual Credit Opportunity: This is an Indiana University Bloomington dual credit course. Students may earn college credit while completing their high school coursework.

🏛️ Indiana College Core Connection: This course counts toward the Social and Behavioral Ways of Knowing category of the Indiana College Core (ICC).

ALGEBRA II • 2522

Algebra II builds on the concepts learned in Algebra I and helps students develop stronger problem-solving and critical-thinking skills. Students explore linear and quadratic functions and expand their understanding of polynomial, rational, exponential, logarithmic, and radical functions.

Additional topics include polynomials, complex numbers, rational exponents, sequences and series, and the equations and graphs of conic sections. Throughout the course, students practice solving equations, analyzing patterns, interpreting graphs, and applying algebraic concepts to mathematical problems and real-world situations.

🎓 Graduation Requirement: This course is required for graduation.

OPEN TO:	Grades: 11 - 12
PREREQUISITES:	Algebra I
FULL YEAR COURSE	

ALGEBRA II HONORS • 2522

Algebra II Honors covers the same core concepts as regular Algebra II but explores them in greater depth and at a faster pace. Students strengthen their problem-solving and critical-thinking skills while expanding their understanding of algebraic concepts and functions. The course also introduces trigonometry to help prepare students for advanced mathematics.

🎓 Dual Credit Prerequisite: Algebra II Honors is required for students planning to take the IU ACP Dual Credit Pre-Calculus/Trigonometry course.

PRINCIPLES OF BUSINESS MANAGEMENT • 4562 / BUS X100

Explore how businesses are managed—and learn what it takes to make smart business decisions!

What does it take to run a successful business? In this course, students will explore the role of business managers and learn how businesses operate in today's changing world. Topics will include business management, leadership, organization, decision-making, and business operations.

Students will examine how managers guide businesses through everyday challenges while considering the economic, political, and social factors that influence business decisions. Through real-world examples and business scenarios, students will gain a better understanding of how businesses operate, respond to change, and make decisions that affect employees, customers, and communities.

This course is a great choice for students interested in business, management, entrepreneurship, leadership, marketing, finance, or pursuing a career in the business world.

🎓 Dual Credit Opportunity: This is an Indiana University Bloomington dual credit course. Students may earn college credit while completing their high school coursework.

🏛️ Indiana College Core Connection: This course counts toward the Social and Behavioral Ways of Knowing category of the Indiana College Core (ICC).

OPEN TO:	Grades: 10 - 12
PREREQUISITES:	Algebra I and Geometry with a B or higher. Geometry Honors preferred or teacher approval.
FULL YEAR COURSE	Weighted

CALCULUS • 2527/ M211 ACP

Calculus builds on students' previous math courses and explores how quantities change and how mathematical relationships can be used to solve complex problems. Students study functions, graphs, limits, continuity, derivatives, and integrals while reviewing algebra, trigonometry, and mathematical modeling.

Throughout the course, students learn to analyze functions, calculate rates of change, and use derivatives and integrals to solve problems in real-world situations. Emphasis is placed on logical reasoning, problem-solving, and applying mathematical concepts to prepare for advanced college-level mathematics and related fields.

🎓 IU ACP Dual Credit: This course is offered through Indiana University's Advanced College Project (ACP) program, giving students the opportunity to earn college credit while completing high school coursework.

OPEN TO:	Grades: 12
PREREQUISITES:	Pre-Calculus and Trig Honors with a B- or above or permission of instructor.
FULL YEAR COURSE	Indiana College Core, Weighted

FINITE MATHEMATICS • 2530/ M118 ACP

PRINCIPLES OF BUSINESS MANAGEMENT • 4562 / BUS X100

Explore how businesses are managed—and learn what it takes to make smart business decisions!

What does it take to run a successful business? In this course, students will explore the role of business managers and learn how businesses operate in today's changing world. Topics will include business management, leadership, organization, decision-making, and business operations.

Students will examine how managers guide businesses through everyday challenges while considering the economic, political, and social factors that influence business decisions. Through real-world examples and business scenarios, students will gain a better understanding of how businesses operate, respond to change, and make decisions that affect employees, customers, and communities.

This course is a great choice for students interested in business, management, entrepreneurship, leadership, marketing, finance, or pursuing a career in the business world.

🎓 Dual Credit Opportunity: This is an Indiana University Bloomington dual credit course. Students may earn college credit while completing their high school coursework.

🏛️ Indiana College Core Connection: This course counts toward the Social and Behavioral Ways of Knowing category of the Indiana College Core (ICC).

Finite Mathematics is designed for students planning to pursue college-level math or earn an Academic Honors diploma or the Indiana College Core. Students learn how to use mathematical models and problem-solving strategies to understand and solve real-world problems.

Topics include set theory, counting and probability, introductory statistics, matrices, linear programming, game theory, Markov chains, and financial mathematics. These concepts are especially useful for students interested in business, social sciences, life sciences, and physical sciences.

🎓 IU ACP Dual Credit: This course is offered through Indiana University's Advanced College Project (ACP) program, giving students the opportunity to earn college credit while completing high school coursework.

OPEN TO:	Grades: 11 - 12
PREREQUISITES:	Algebra II or Algebra II Honors with a C- or above or teacher recommendation.
FULL YEAR COURSE	Indiana College Core. Weighted

GEOMETRY • 2532

Geometry is a full-year course that explores the properties and relationships of two- and three-dimensional shapes. Students study lines, angles, triangles, circles, quadrilaterals, polygons, and other geometric figures while learning about congruence, similarity, and spatial relationships.

Throughout the course, students develop critical-thinking and problem-solving skills by using logical reasoning, writing geometric proofs, and applying trigonometric ratios to solve problems involving triangles. Students also participate in hands-on investigations, geometric constructions, and technology-based activities to strengthen their understanding of geometric concepts.

PRINCIPLES OF BUSINESS MANAGEMENT • 4562 / BUS X100

Explore how businesses are managed—and learn what it takes to make smart business decisions!

What does it take to run a successful business? In this course, students will explore the role of business managers and learn how businesses operate in today's changing world. Topics will include business management, leadership, organization, decision-making, and business operations.

Students will examine how managers guide businesses through everyday challenges while considering the economic, political, and social factors that influence business decisions. Through real-world examples and business scenarios, students will gain a better understanding of how businesses operate, respond to change, and make decisions that affect employees, customers, and communities.

This course is a great choice for students interested in business, management, entrepreneurship, leadership, marketing, finance, or pursuing a career in the business world.

🎓 Dual Credit Opportunity: This is an Indiana University Bloomington dual credit course. Students may earn college credit while completing their high school coursework.

🏛️ Indiana College Core Connection: This course counts toward the Social and Behavioral Ways of Knowing category of the Indiana College Core (ICC).

📐 Course Requirement: Students must have a scientific or graphing calculator.

OPEN TO:	Grades: 9 - 12
PREREQUISITES:	Algebra I with a B or higher, or teacher approval
FULL YEAR COURSE	Weighted

APPLIED GEOMETRY • 2532A

In this course, students build on their middle school math skills while exploring the properties and relationships of geometric shapes. Topics include points, lines, angles, planes, triangles, quadrilaterals, other polygons, circles, transformations, and three-dimensional figures.

Through guided instruction, hands-on activities, and problem-solving practice, students learn to recognize shapes, understand geometric relationships, and apply math concepts to real-world situations. The course follows Indiana's Geometry Content Connectors and focuses on developing practical math skills, logical thinking, and problem-solving strategies.

🎓 Alternate Diploma: This course is available only to students working toward an alternate diploma.

OPEN TO:	Grades: 9 - 12
APPLIED UNITS:	4 units maximum
FULL YEAR COURSE	Counts as a math requirement for the Certificate of Completion.

PRE-CALCULUS: ALGEBRA • 2564

PRINCIPLES OF BUSINESS MANAGEMENT • 4562 / BUS X100

Explore how businesses are managed—and learn what it takes to make smart business decisions!

What does it take to run a successful business? In this course, students will explore the role of business managers and learn how businesses operate in today's changing world. Topics will include business management, leadership, organization, decision-making, and business operations.

Students will examine how managers guide businesses through everyday challenges while considering the economic, political, and social factors that influence business decisions. Through real-world examples and business scenarios, students will gain a better understanding of how businesses operate, respond to change, and make decisions that affect employees, customers, and communities.

This course is a great choice for students interested in business, management, entrepreneurship, leadership, marketing, finance, or pursuing a career in the business world.

🎓 Dual Credit Opportunity: This is an Indiana University Bloomington dual credit course. Students may earn college credit while completing their high school coursework.

🏛️ Indiana College Core Connection: This course counts toward the Social and Behavioral Ways of Knowing category of the Indiana College Core (ICC).

Pre-Calculus: Algebra builds on the algebra and functions students have learned in previous math courses and prepares them for college-level mathematics, including calculus. Students explore more advanced functions and learn how to use mathematical concepts to solve complex problems.

Topics include quadratic, polynomial, and rational functions; exponential and logarithmic functions; sequences and series; and conic sections. Students also strengthen their understanding of angles, measurement, and mathematical relationships while developing critical-thinking and problem-solving skills.

This course is designed for students who plan to pursue college programs or careers that involve advanced mathematics, such as engineering, science, technology, or other math-related fields.

📐 Course Requirement: A graphing calculator is required. A TI-83 Plus Silver Edition or TI-84 is recommended.

OPEN TO:	Grades: 11 - 12
PREREQUISITES:	Algebra I, Geometry and Algebra II with a C or higher.
SEMESTER COURSE	

PRE-CALCULUS: ALGEBRA HONORS • 2564/ M125 ACP

📐 Course Requirement: A graphing calculator is required. A TI-83 Plus Silver Edition or TI-84 is recommended.

🎓 IU ACP Dual Credit: This course is offered through Indiana University's Advanced College Project (ACP) program. Eligible students have the opportunity to earn college credit while completing their high school

OPEN TO:	Grades: 11 - 12
PREREQUISITES:	Algebra I, Geometry and Algebra II Honors with an overall GPA of 2.70 or higher.
SEMESTER COURSE	Indiana College Core, Weighted

PRE-CALCULUS: TRIGONOMETRY • 2566

re-Calculus: Trigonometry builds on students' previous math skills and explores how angles, triangles, and mathematical patterns relate to the world around us. Students learn how trigonometry is used in fields such as engineering, medicine, music, finance, computer programming, and other science, technology, engineering, and math (STEM) careers.

Topics include the unit circle, triangles, periodic functions, trigonometric identities, polar coordinates, complex and imaginary numbers, and vectors. Students develop problem-solving and critical-thinking skills while learning to analyze patterns, work with angles, and apply trigonometric concepts to solve problems.

This course helps prepare students for advanced college-level mathematics and future studies or careers that require strong math skills.

📐 Course Requirement: A graphing calculator is required. A TI-83 Plus Silver Edition or TI-84 is recommended.

PRIME MATH • 2595

PRIME Math helps students strengthen the math skills they need for success after high school. Using a curriculum developed by the Southern Regional Education Board (SREB), students review and build on concepts from Algebra I, Geometry, Algebra II, and Statistics.

Rather than simply memorizing formulas and procedures, students focus on understanding why math works and how to use it. They practice problem-solving, critical thinking, and applying math concepts to different situations.

This course is designed for students who have met the minimum high school math requirements but would benefit from additional practice and support before taking college-level math courses that earn college credit. PRIME Math helps students build confidence and prepare for future education and career opportunities.

OPEN TO:	Grades: 12

🏛️ Indiana College Core Connection: This course counts toward the Social and Behavioral Ways of Knowing category of the Indiana College Core (ICC).

Applied Community Service gives students the opportunity to earn high school credit by participating in approved community service projects or volunteer activities. Students gain hands-on experience helping others, contributing to their community, and developing important skills such as teamwork, communication, responsibility, and dependability. Service activities must meet course guidelines and relate to a course the student is currently taking or plans to take.

Students in grades 9–12 may earn up to two high school credits through approved community service experiences. This course fulfills the employability requirement for the alternate diploma.

🎓 Alternate Diploma: This course is available only to students working toward an alternate diploma.

OPEN TO:	Grades 11, 12
APPLIED UNITS	2 maximum
FULL YEAR COURSE	Alternate Diploma

INTRODUCTION TO PUBLIC SERVICE • 3524

Introduction to Public Service explores career opportunities in both military and non-military public service. Students learn how public service supports communities and contributes to society while discovering the personal and professional benefits of serving others.

The course includes an overview of U.S. military history and the history of non-military public service. Students also explore military customs and courtesies, ethical decision-making, leadership, and critical-thinking skills. They learn about a variety of public service careers, including job responsibilities, entry requirements, and available incentives.

MUSICAL THEATER • 0518

Musical Theater gives students a hands-on look at the many creative and technical parts of producing a musical. Students explore the history of musical theater and its role in today's society while gaining experience with staging, choreography, rehearsals, performance, and the technical side of production.

Students may take part in designing, building, managing, and supporting a musical production while developing skills in areas such as acting, directing, stagecraft, and arts management. The course may also explore specialized theater topics, including Shakespeare, Children's Theatre, and other areas of theater arts.

Students will learn through creating, performing, analyzing, and responding to theater. They will also explore careers in the performing arts, attend and critique theatrical productions, and learn about the role audiences and community members play in supporting the arts.

🎭 **Performance Expectations:** Students are required to participate in after-school activities related to the high school musical, including rehearsals and **every scheduled performance**. Additional time outside the regular school day should be expected during the production process.

OPEN TO:	Grades: 9 - 12

INTERMEDIATE CONCERT BAND • 4168

Intermediate Concert Band helps students strengthen their instrumental skills and grow as musicians through rehearsals, ensemble playing, and performances. Students develop proper tone, technique, tuning, music-reading, listening, and music-analysis skills while exploring a variety of concert band selections from different musical styles and historical periods.

Students learn how to work together as an ensemble, interpret a composer's intentions, and bring music to life through performance. The course builds musicianship, teamwork, discipline, and confidence while helping students deepen their understanding and appreciation of music.

🎵 Performance Expectations: Students are required to participate in performances and related musical activities outside the regular school day. Additional rehearsals may also be scheduled outside of school hours.

💲 Course Costs: Students may have costs for instrument supplies and maintenance, such as reeds or instrument oil. Students who play percussion or use a school-provided instrument may also be charged an instrument rental fee.

OPEN TO:	Grades: 9 - 12
PREREQUISITES:	Prior enrollment in band at ICHS or ICMS, or approval from the director.
FULL YEAR COURSE	
NOTES:	This course may be repeated for credit.

ADVANCED CONCERT BAND (SYMPHONIC) • 4170

Advanced Concert Band gives students the opportunity to build on their instrumental skills and perform challenging concert band music. Through ensemble and solo performances, students strengthen their tone,

🏛️ Indiana College Core Connection: This course counts toward the Social and Behavioral Ways of Knowing category of the Indiana College Core (ICC).

Students will build their creativity and musical understanding through improvisation, composing, arranging, performing, listening, and analyzing music. The course focuses on developing vocal technique, musical expression, and the ability to perform jazz with confidence and style.

🎤 **Auditions:** This is an audition-only class. Students should demonstrate strong vocal skills, musical ability, and a willingness to grow as a performer.

🎵 **Performance Expectations:** Students are required to participate in performances and related musical activities outside the regular school day. Additional rehearsals may also be scheduled outside of school hours.

OPEN TO:	Grades: 9 - 12
PREREQUISITES:	Passed audition
FULL YEAR COURSE	

INTERMEDIATE CHORUS • 4186

Intermediate Chorus is an audition-only, competitive show choir open to students throughout the school. Students do not need to be enrolled in another chorus to audition. This ensemble focuses on developing vocal skills, musicianship, and performance abilities through group and solo singing. Students will practice reading rhythms, melodies, and harmonies while performing a variety of musical styles, ranging from pop to Renaissance music.

This group performs more frequently than other choral ensembles and features choreography, so students should have a sense of rhythm and be comfortable learning movement to music. The music is more challenging, and students are expected to demonstrate strong musical ability, participate actively, improve their skills, and contribute to the success of the ensemble.

🎤 **Auditions:** Auditions will be announced. Students must demonstrate considerable musical ability to be considered for this competitive ensemble.

PRINCIPLES OF BUSINESS MANAGEMENT • 4562 / BUS X100

NOTES:	This course may be repeated for credit.

ADVANCED CHORUS • 4188

Advanced Chorus is an audition-only, mixed show choir open to students throughout the school. Students do not need to be enrolled in another chorus to audition. This ensemble is designed for students with strong musical abilities who are ready for a more challenging choral and performance experience.

Students develop advanced vocal skills and musicianship through ensemble and solo singing. They will perform challenging choral music in a variety of styles, ranging from pop to Renaissance. Students will also learn to read rhythms, melodies, and harmonies, interpret music, and communicate the composer's intent to connect with an audience. Choreography is included, so students should have a sense of rhythm and be comfortable learning movement to music.

Students are expected to demonstrate musical ability, participate actively, improve their skills, and contribute to the success of the ensemble. Advanced Chorus performs more frequently than other chorus classes and requires a strong commitment to rehearsals and performances.

APPLIED MUSIC GUITAR • 4200

Applied Music in Guitar introduces students to playing the guitar while building musical skills, creativity, and confidence. Students learn proper posture and playing techniques, along with how to read guitar music through sight-reading and music theory. They also explore traditional Western music theory and learn to read chord progressions using lead sheets.

Students practice and perform a variety of musical styles, including classical, jazz, folk, and contemporary music. They develop listening skills by evaluating musical performances and learning to recognize different musical techniques. By the end of the course, students will build the skills needed to read guitar music and learn new pieces independently.

🎸 No previous guitar experience is required. Students must provide their own guitar or have their own access to an instrument.

OPEN TO:	Grades: 9 - 12
PREREQUISITES:	Must have your own guitar.
ONE SEMESTER COURSE	

APPLIED MUSIC PERCUSSION PERFORMANCE • 4200

Percussion Performance introduces students to a variety of percussion instruments and helps them develop their musical skills in a fun, hands-on learning environment. This course is ideal for students who are new to percussion as well as Indian Creek band students who want to expand their percussion experience.

What does it take to run a successful business? In this course, students will explore the role of business managers and learn how businesses operate in today's changing world. Topics will include business management, leadership, organization, decision-making, and business operations.

Students will examine how managers guide businesses through everyday challenges while considering the economic, political, and social factors that influence business decisions. Through real-world examples and business scenarios, students will gain a better understanding of how businesses operate, respond to change, and make decisions that affect employees, customers, and communities.

This course is a great choice for students interested in business, management, entrepreneurship, leadership, marketing, finance, or pursuing a career in the business world.

🎓 **Dual Credit Opportunity: This is an Indiana University Bloomington dual credit course. Students may earn college credit while completing their high school coursework.**

🏛️ **Indiana College Core Connection: This course counts toward the Social and Behavioral Ways of Knowing category of the Indiana College Core (ICC).**

Students learn to play pitched percussion instruments, such as the xylophone, marimba, orchestra bells, chimes, and vibraphone, along with unpitched instruments, including drums, cymbals, and other percussion accessories. They practice performing both independently and as part of an ensemble while developing teamwork and listening skills.

Students also explore the basics of music theory, including rhythm and reading treble and bass clefs. Through practice and performance, they build musicianship, confidence, and an appreciation for creating music together.

OPEN TO:	Grades: 9 - 12
PREREQUISITES:	None
ONE SEMESTER COURSE	

ELECTRONIC MUSIC • 4202

Electronic Music introduces students to the creative world of music technology. Students explore how technology is used to record, produce, compose, and edit music while developing hands-on skills with electronic media and digital music tools.

The course begins with the history of electronic music and explores how sound works through music physics and acoustics. Students then learn about recording techniques, electronic music composition, sound design, and the music business. They also examine copyright laws and other legal issues that affect musicians and music producers.

Through creative projects and hands-on activities, students develop the skills to create, perform, and evaluate music while discovering how technology shapes today's music industry.

OPEN TO:	Grades: 9 - 12
PREREQUISITES:	None

PRINCIPLES OF BUSINESS MANAGEMENT • 4562 / BUS X100

Explore how businesses are managed—and learn what it takes to make smart business decisions!

What does it take to run a successful business? In this course, students will explore the role of business managers and learn how businesses operate in today's changing world. Topics will include business management, leadership, organization, decision-making, and business operations.

Students will examine how managers guide businesses through everyday challenges while considering the economic, political, and social factors that influence business decisions. Through real-world examples and business scenarios, students will gain a better understanding of how businesses operate, respond to change, and make decisions that affect employees, customers, and communities.

This course is a great choice for students interested in business, management, entrepreneurship, leadership, marketing, finance, or pursuing a career in the business world.

🎓 **Dual Credit Opportunity: This is an Indiana University Bloomington dual credit course. Students may earn college credit while completing their high school coursework.**

🏛️ **Indiana College Core Connection: This course counts toward the Social and Behavioral Ways of Knowing category of the Indiana College Core (ICC).**

ONE SEMESTER COURSE	

PIANO AND ELECTRONIC KEYBOARD • 4204

Piano and Electronic Keyboard introduces students to playing the piano and electronic keyboard while building musical skills and confidence. Students learn proper posture, hand position, fingering, rhythm, and articulation as they develop their ability to read and perform music.

Students practice playing a variety of musical selections, create simple accompaniments, and explore composing and improvising their own melodies and harmonies. They also learn to listen to and analyze music from different styles, practice sight-reading, and make musical choices that express their own interpretation of a piece.

This course is a great opportunity for students to develop their musicianship, creativity, and appreciation for music.

OPEN TO:	Grades: 9 - 12
PREREQUISITES:	1 semester of band or choir recommended but not required.
ONE SEMESTER COURSE	

AP MUSIC THEORY • 4210

AP Music Theory is a challenging, college-level course designed for students who want to develop a deeper understanding of how music works. Students explore melody, harmony, rhythm, texture, musical form, and musical styles while learning to analyze music and create their own compositions. The course also focuses on reading and writing musical notation, ear training, sight-singing, and recognizing musical patterns by listening.

PRINCIPLES OF BUSINESS MANAGEMENT • 4562 / BUS X100

Explore how businesses are managed—and learn what it takes to make smart business decisions!

What does it take to run a successful business? In this course, students will explore the role of business managers and learn how businesses operate in today's changing world. Topics will include business management, leadership, organization, decision-making, and business operations.

Students will examine how managers guide businesses through everyday challenges while considering the economic, political, and social factors that influence business decisions. Through real-world examples and business scenarios, students will gain a better understanding of how businesses operate, respond to change, and make decisions that affect employees, customers, and communities.

This course is a great choice for students interested in business, management, entrepreneurship, leadership, marketing, finance, or pursuing a career in the business world.

🎓 **Dual Credit Opportunity: This is an Indiana University Bloomington dual credit course. Students may earn college credit while completing their high school coursework.**

🏛️ **Indiana College Core Connection: This course counts toward the Social and Behavioral Ways of Knowing category of the Indiana College Core (ICC).**

This course is ideal for students who are serious about music or are considering majoring in music in college or pursuing a music-related career. Because the coursework is rigorous and comparable to a first-semester college music theory course, students should be prepared for in-depth study and regular practice.

🎓 **Eligibility:** Students must have completed at least two years of band or choir. Students with piano or private music-study experience outside of school may also be eligible with a teacher recommendation.

🎼 **Course Recommendation:** Students planning to major in music are encouraged to take AP Music Theory during their junior or senior year. The skills and knowledge gained in this course can help prepare students for college music studies and entrance auditions.

📝 **AP Exam:** Taking the AP Music Theory exam in the spring is highly recommended.

OPEN TO:	Grades: 11 - 12
PREREQUISITES:	2 years of band, choir, or completion of Introduction to music theory.
FULL YEAR COURSE	Weighted

ADVANCED FINE ARTS, COLLEGE CREDIT • 4260/ HUMA 118

Music Appreciation introduces students to a variety of musical styles, genres, composers, and compositions from different time periods and cultures. Students develop their listening skills and explore how music communicates emotions, tells stories, and serves as a form of art, entertainment, and self-expression.

Students examine how music influences culture and how culture shapes the music we hear. They also have opportunities to discuss and evaluate musical selections and are strongly encouraged to attend a live musical performance to experience music firsthand.

PRINCIPLES OF BUSINESS MANAGEMENT • 4562 / BUS X100

Explore how businesses are managed—and learn what it takes to make smart business decisions!

What does it take to run a successful business? In this course, students will explore the role of business managers and learn how businesses operate in today's changing world. Topics will include business management, leadership, organization, decision-making, and business operations.

Students will examine how managers guide businesses through everyday challenges while considering the economic, political, and social factors that influence business decisions. 🏛️ **Indiana College Core Connection: This course counts toward the Social and Behavioral Ways of Knowing category of the Indiana College Core (ICC).**

🎓 Ivy Tech Dual Credit: This course offers students the opportunity to earn both high school and college credit through Ivy Tech Community College.

OPEN TO:	Grades: 10 - 12
PREREQUISITES:	
ONE SEMESTER COURSE	

Science Department

ENVIRONMENTAL SCIENCE • 3010

Environmental Science explores how **people, living things, and the environment are connected**. This interdisciplinary course combines concepts from biology, Earth science, chemistry, and other areas of science to help students better understand the world around them.

Students will investigate topics such as **ecosystems, energy and matter, natural disasters, biodiversity, population growth, pollution, natural resources, and environmental policies**. They will also explore how human activities affect environmental systems and how environmental challenges can impact communities locally and around the world.

Learning is hands-on and focused on real-world environmental issues. Students will **design and conduct laboratory and field investigations**, collect and analyze data, and use scientific evidence to explore environmental questions and problems.

PRINCIPLES OF BUSINESS MANAGEMENT • 4562 / BUS X100

Explore how businesses are managed—and learn what it takes to make smart business decisions!

What does it take to run a successful business? In this course, students will explore the role of business managers and learn how businesses operate in today's changing world. Topics will include business management, leadership, organization, decision-making, and business operations.

Students will examine how managers guide businesses through everyday challenges while considering the economic, political, and social factors that influence business decisions. Through real-world examples and business scenarios, students will gain a better understanding of how businesses operate, respond to change, and make decisions that affect employees, customers, and communities.

This course is a great choice for students interested in business, management, entrepreneurship, leadership, marketing, finance, or pursuing a career in the business world.

🎓 Dual Credit Opportunity: This is an Indiana University Bloomington dual credit course. Students may earn college credit while completing their high school coursework.

🏛️ Indiana College Core Connection: This course counts toward the Social and Behavioral Ways of Knowing category of the Indiana College Core (ICC).

🔬 **Laboratory & Field Experiences:** Students will participate in laboratory activities and field investigations that allow them to study environmental systems and apply scientific concepts in real-world settings.

OPEN TO:	Grades: 11- 12
PREREQUISITES:	None
FULL YEAR COURSE	

BIOLOGY I • 3024

Biology helps students understand **how living things work, interact, and adapt to their environment**. Through hands-on laboratory activities and field investigations, students explore the structures and functions of **cells, tissues, organs, and body systems**, as well as how organisms interact within populations, communities, ecosystems, and the biosphere.

Students will explore topics including **microbiology, human physiology, genetics, ecology, and the history of biological discoveries**. They will investigate real-world biological questions and explore how biology connects to **health, careers, technology, personal decisions, and current issues**.

Students will use technology to **conduct research, analyze information, and communicate scientific ideas**. They will also examine how advances in technology have changed the way scientists study and understand living organisms.

🎓 **Graduation Requirement:** Biology is a **graduation requirement for students pursuing all diploma types**.

OPEN TO:	Grades: 9
PREREQUISITES:	None

PRINCIPLES OF BUSINESS MANAGEMENT • 4562 / BUS X100

Explore how businesses are managed—and learn what it takes to make smart business decisions!

What does it take to run a successful business? In this course, students will explore the role of business managers and learn how businesses operate in today's changing world. Topics will include business management, leadership, organization, decision-making, and business operations.

Students will examine how managers guide businesses through everyday challenges while considering the economic, political, and social factors that influence business decisions. FULL YEAR COURSE	

BIOLOGY I HONORS • 3024

Biology I Honors covers the same core standards as Biology I while providing students with opportunities to **explore topics in greater depth, move at a faster pace, and take on more challenging coursework**. Students will investigate how living things are organized, how they maintain balance, and how biological processes allow life to continue.

Students will explore topics including **cells and their structures, energy and matter, homeostasis, genetics, inheritance, cell reproduction, evolution, microbiology, human physiology, population genetics, and ecology**. Students will examine how genes and the environment influence organisms and how natural selection contributes to the diversity of life.

Through laboratory investigations, research, technology, and scientific problem-solving, students will have opportunities to **analyze data, investigate biological questions, and communicate scientific ideas**. The course is designed for students who enjoy science and are ready for a **faster pace and greater academic challenge**.

🎓 **Graduation Requirement:** Biology I Honors **fulfills the Biology I graduation requirement** for students pursuing **all diploma types**. Students take Biology I Honors **in place of regular Biology I**.

⭐ **Weighted Course:** Due to the increased rigor and accelerated pace, Biology I Honors is calculated as a **weighted course**.

OPEN TO:	Grades: 9
PREREQUISITES:	2.7 GPA or higher.
FULL YEAR COURSE	

PRINCIPLES OF BUSINESS MANAGEMENT • 4562 / BUS X100

Explore how businesses are managed—and learn what it takes to make smart business decisions!

What does it take to run a successful business? In this course, students will explore the role of business managers and learn how businesses operate in today's changing world. Topics will include business management, leadership, organization, decision-making, and business operations.

Students will examine how managers guide businesses through everyday challenges while considering the economic, political, and social factors that influence business decisions. Through real-world examples and business scenarios, students will gain a better understanding of how businesses operate, respond to change, and make decisions that affect employees, customers, and communities.

This course is a great choice for students interested in business, management, entrepreneurship, leadership, marketing, finance, or pursuing a career in the business world.

🎓 **Dual Credit Opportunity: This is an Indiana University Bloomington dual credit course. Students may earn college credit while completing their high school coursework.**

🏛️ **Indiana College Core Connection: This course counts toward the Social and Behavioral Ways of Knowing category of the Indiana College Core (ICC).**

APPLIED BIOLOGY I • 3024A

Biology explores the science of life and how living things function, grow, reproduce, and interact with their environment. Students will study topics such as cell structure and reproduction, cellular chemistry, energy transfer, matter cycles, ecosystems, heredity, genetics, and evolution.

Students will learn how scientists use observations, experiments, and evidence to understand the natural world. Through hands-on investigations, students will design and conduct experiments, analyze and evaluate results, and communicate their findings using accepted scientific practices.

This course helps students develop critical-thinking and problem-solving skills while gaining a better understanding of the living world around them.

🎓 **Alternate Diploma:** This course is available **only to students working toward the Alternate Diploma**.

OPEN TO:	Grades: 9 - 12
APPLIED UNITS:	4 units maximum.
FULL YEAR COURSE	Counts as a science requirement for the Alternate Diploma

BIOLOGY II • 3026/ L100 ACP

PRINCIPLES OF BUSINESS MANAGEMENT • 4562 / BUS X100

Explore how businesses are managed—and learn what it takes to make smart business decisions!

What does it take to run a successful business? In this course, students will explore the role of business managers and learn how businesses operate in today's changing world. Topics will include business management, leadership, organization, decision-making, and business operations.

Students will examine how managers guide businesses through everyday challenges while considering the economic, political, and social factors that influence business decisions. Through real-world examples and business scenarios, students will gain a better understanding of how businesses operate, respond to change, and make decisions that affect employees, customers, and communities.

This course is a great choice for students interested in business, management, entrepreneurship, leadership, marketing, finance, or pursuing a career in the business world.

🎓 **Dual Credit Opportunity: This is an Indiana University Bloomington dual credit course. Students may earn college credit while completing their high school coursework.**

🏛️ **Indiana College Core Connection: This course counts toward the Social and Behavioral Ways of Knowing category of the Indiana College Core (ICC).**

This course is an **Indiana University Advanced College Project (IU ACP) course** that gives students the opportunity to earn **dual credit—high school and college credit**—while studying the science of life.

Students will explore how living things are organized and how they function, starting with **molecules and cells** and moving to **individual organisms, populations, and ecosystems**. Special attention will be given to biological processes that are common to all living things, with a focus on how these processes apply to **human biology**.

Through this course, students will build a deeper understanding of biology while gaining experience with college-level coursework and expectations.

🎓 **Dual Credit:** Students may earn **Indiana University college credit** through the IU Advanced College Project (ACP) program, provided they meet IU ACP eligibility and enrollment requirements.

⭐ **Weighted Course:** Because Biology II Dual Credit includes **college-level coursework and increased academic rigor**, it is calculated as a **weighted course**.

🎓 **Indiana College Core:** This course is an **Indiana College Core-approved course** and may count toward the Indiana College Core requirements when applicable.

OPEN TO:	Grades: 10 - 12
PREREQUISITES:	2.70 GPA and a B or higher in Biology I and Chemistry I. Sophomores must request permission from the instructor.
FULL YEAR COURSE	I

bases. Students will also become familiar with the periodic table and learn how to write chemical formulas and understand basic chemical reactions.

🧪 **Laboratory Experiences:** Students will participate in hands-on investigations such as building molecular models, observing chemical reactions, comparing solids, liquids, and gases, conducting flame tests, preparing solutions, and testing acids, bases, and salts. Students will use laboratory investigations to develop models that explain the structure of matter and how substances interact.

Throughout the course, students will also explore the history of chemistry, discover how chemistry is used in different careers, investigate chemistry-related questions and real-world issues, and practice important laboratory safety skills.

🏅 **Honors Seal Requirement:** Chemistry is **required for students pursuing the Enrollment Honors Seal or Enrollment Honors Plus Seal**.

OPEN TO:	Grades: 10
PREREQUISITES:	Algebra I
FULL YEAR COURSE	

CHEMISTRY I HONORS • 3064

Chemistry I Honors is a rigorous, college-preparatory science course designed for students who want a deeper and more challenging study of chemistry. The course covers the same core concepts as Chemistry I while placing greater emphasis on **College Board standards**, advanced problem-solving, and preparation for future courses such as **Chemistry II and AP Chemistry**.

Students will explore the structure and behavior of matter, chemical reactions, bonding, energy, and other fundamental chemistry concepts through laboratory investigations, scientific analysis, and problem-solving.

PRINCIPLES OF BUSINESS MANAGEMENT • 4562 / BUS X100

Explore how businesses are managed—and learn what it takes to make smart business decisions!

What does it take to run a successful business? In this course, students will explore the role of business managers and learn how businesses operate in today's changing world. Topics will include business management, leadership, organization, decision-making, and business operations.

Students will examine how managers guide businesses through everyday challenges while considering the economic, political, and social factors that influence business decisions. PRINCIPLES OF BUSINESS MANAGEMENT • 4562 / BUS X100

Explore how businesses are managed—and learn what it takes to make smart business decisions!

What does it take to run a successful business? In this course, students will explore the role of business managers and learn how businesses operate in today's changing world. Topics will include business management, leadership, organization, decision-making, and business operations.

Students will examine how managers guide businesses through everyday challenges while considering the economic, political, and social factors that influence business decisions. Through real-world examples and business scenarios, students will gain a better understanding of how businesses operate, respond to change, and make decisions that affect employees, customers, and communities.

This course is a great choice for students interested in business, management, entrepreneurship, leadership, marketing, finance, or pursuing a career in the business world.

🎓 **Dual Credit Opportunity: This is an Indiana University Bloomington dual credit course. Students may earn college credit while completing their high school coursework.**

🏛️ **Indiana College Core Connection: This course counts toward the Social and Behavioral Ways of Knowing category of the Indiana College Core (ICC).**

Physics is a **lab-based science course** that explores how matter and energy interact and how the laws of physics explain the world around us. Students will use scientific investigation, mathematical analysis, and problem-solving to understand how and why things move, change, and interact.

Topics include **motion, mechanics, thermodynamics, gravity, work and energy, waves, light, sound, electricity, magnetism, electromagnetism, and atomic and nuclear physics**. Students will use mathematical models and scientific laws to solve problems and explain real-world phenomena.

🔬 **Laboratory Experiences:** Students will conduct hands-on investigations involving motion, heat, mirrors and lenses, electric circuits, and electromagnets. Laboratory activities give students opportunities to collect and analyze data and apply physics concepts to real-world situations.

Students will also explore the **history of physics and its impact on technology**, investigate how physics is used in different careers, and examine physics-related questions connected to everyday life and society.

🎓 **Course Recommendation:** This course is recommended for students interested in **science, engineering, technology, or other science-related careers**.

OPEN TO:	Grades: 11 - 12
PREREQUISITES:	Algebra II with a C average or permission of the instructor
FULL YEAR COURSE	Weighted

ADVANCED LIFE SCIENCE, ZOOLOGY • 3092

Zoology is the study of **animal life** and how animals are structured, function, and interact with their environments. Students will explore the anatomy and physiology of both vertebrates and invertebrates while learning about the major groups, or phyla, of the Animal Kingdom.

PRINCIPLES OF BUSINESS MANAGEMENT • 4562 / BUS X100

Explore how businesses are managed—and learn what it takes to make smart business decisions!

What does it take to run a successful business? In this course, students will explore the role of business managers and learn how businesses operate in today's changing world. Topics will include business management, leadership, organization, decision-making, and business operations.

Students will examine how managers guide businesses through everyday challenges while considering the economic, political, and social factors that influence business decisions. Through real-world examples and business scenarios, students will gain a better understanding of how businesses operate, respond to change, and make decisions that affect employees, customers, and communities.

This course is a great choice for students interested in business, management, entrepreneurship, leadership, marketing, finance, or pursuing a career in the business world.

🎓 **Dual Credit Opportunity: This is an Indiana University Bloomington dual credit course. Students may earn college credit while completing their high school coursework.**

🏛️ **Indiana College Core Connection: This course counts toward the Social and Behavioral Ways of Knowing category of the Indiana College Core (ICC).**

Students will investigate topics such as animal structure, body systems, genetics, habitats, adaptations, and relationships between animals and their environments. The course also explores the important role animals have played in human life, from food and work to companionship and domestication.

🔬 **Laboratory Experiences:** This course includes hands-on laboratory activities and animal dissections that give students the opportunity to observe and study the animals they are learning about firsthand.

📚 **Course Prerequisites:** Students should be self-disciplined and have successfully completed **Biology I and either Chemistry I or ICP**.

OPEN TO:	Grades: 10 - 12
PREREQUISITES:	Sophomores must request permission from the instructor.
FULL YEAR COURSE	

MARINE BIOLOGY, ADVANCED SCIENCE • 3092

Marine Biology is a **laboratory-based science course** that explores the amazing diversity of life found in oceans and other marine environments. Students will learn about major groups of marine animals, ocean ecosystems, ecology, and conservation while investigating how marine organisms interact with one another and their environment.

Students will take their learning beyond the classroom through **hands-on laboratory activities, field experiences, and scuba diving opportunities**. The course includes participation in the **Professional Association of Diving Instructors (PADI) certification program**, giving students the opportunity to develop scuba diving skills and earn a PADI certification.

🤿 **Scuba Diving & Certification:** Students will participate in PADI training and activities as part of the course. Additional requirements may apply to complete the certification program.

PRINCIPLES OF BUSINESS MANAGEMENT • 4562 / BUS X100

Explore how businesses are managed—and learn what it takes to make smart business decisions!

What does it take to run a successful business? In this course, students will explore the role of business managers and learn how businesses operate in today's changing world. Topics will include business management, leadership, organization, decision-making, and business operations.

Students will examine how managers guide businesses through everyday challenges while considering the economic, political, and social factors that influence business decisions. Through real-world examples and business scenarios, students will gain a better understanding of how businesses operate, respond to change, and make decisions that affect employees, customers, and communities.

🌊 **Capstone Experience:** Students will have the opportunity to participate in an **out-of-state capstone dive experience**, tentatively planned for spring break. This experience will allow students to apply what they have learned about marine biodiversity, ecosystems, ecology, and conservation in a real-world setting.

💰 **Course Costs:** Students are responsible for all costs associated with **PADI certification and the capstone experience**, including travel, lodging, meals, equipment, and other related expenses. Costs and fees may vary from year to year.

OPEN TO:	Grades: 10 - 12
PREREQUISITES:	Biology I
FULL YEAR COURSE	

KINESIOLOGY, ADVANCED SCIENCE • 3092

Kinesiology is an **advanced, college-preparatory biology course** that explores how and why the human body moves. Students will study movement in areas such as **sports, dance, physical recreation, everyday activities, and adapted movement** while building on concepts learned in Anatomy and Physiology and Physics.

Students will analyze how the body moves during **daily activities, work tasks, sports, and injury rehabilitation**. They will also explore movement in other animals and learn how scientists use biomechanics to understand and improve movement.

Students will be introduced to **biomechanical terminology and concepts** that expand their understanding of human movement. Because this is an advanced, college-prep course, students should be prepared for **independent study, critical thinking, and applying concepts to real-world movement situations**.

PRINCIPLES OF BUSINESS MANAGEMENT • 4562 / BUS X100

Explore how businesses are managed—and learn what it takes to make smart business decisions!

What does it take to run a successful business? In this course, students will explore the role of business managers and learn how businesses operate in today's changing world. Topics will include business management, leadership, organization, decision-making, and business operations.

Students will examine how managers guide businesses through everyday challenges while considering the economic, political, and social factors that influence business decisions. Through real-world examples and business scenarios, students will gain a better understanding of how businesses operate, respond to change, and make decisions that affect employees, customers, and communities.

This course is a great choice for students interested in business, management, entrepreneurship, leadership, marketing, finance, or pursuing a career in the business world.

🎓 **Dual Credit Opportunity: This is an Indiana University Bloomington dual credit course. Students may earn college credit while completing their high school coursework.**

🏛️ **Indiana College Core Connection: This course counts toward the Social and Behavioral Ways of Knowing category of the Indiana College Core (ICC).**

🔬 **Laboratory Experiences:** Students will participate in laboratory investigations throughout the course. Some labs will involve **physical activity and movement**, so students should be prepared to participate in appropriate activities as part of the learning experience.

OPEN TO:	Grades: 11 - 12
PREREQUISITES:	Biology/Honors Biology & Anatomy with a C or higher.
FULL YEAR COURSE	Weighted

APPLIED PHYSICAL SCIENCE • 3102A

Applied Physical Science is a hands-on science course designed to help students understand how science connects to everyday life. Students will develop problem-solving skills while exploring basic concepts in **chemistry, physics, Earth science, and space science**.

Through laboratory and field investigations, students will explore science topics that connect to their interests and real-world situations. Activities will give students opportunities to ask questions, investigate problems, collect information, and apply scientific concepts to everyday challenges.

🎓 **Alternate Diploma:** This course is available **only to students working toward the Alternate Diploma**.

OPEN TO:	Grades: 9 - 12
APPLIED UNITS:	2 units maximum.
FULL YEAR COURSE	

INTEGRATED CHEMISTRY/PHYSICS • 3108

PRINCIPLES OF BUSINESS MANAGEMENT • 4562 / BUS X100

Explore how businesses are managed—and learn what it takes to make smart business decisions!

What does it take to run a successful business? In this course, students will explore the role of business managers and learn how businesses operate in today's changing world. Topics will include business management, leadership, organization, decision-making, and business operations.

Students will examine how managers guide businesses through everyday challenges while considering the economic, political, and social factors that influence business decisions. Through real-world examples and business scenarios, students will gain a better understanding of how businesses operate, respond to change, and make decisions that affect employees, customers, and communities.

This course is a great choice for students interested in business, management, entrepreneurship, leadership, marketing, finance, or pursuing a career in the business world.

🎓 **Dual Credit Opportunity: This is an Indiana University Bloomington dual credit course. Students may earn college credit while completing their high school coursework.**

🏛️ **Indiana College Core Connection: This course counts toward the Social and Behavioral Ways of Knowing category of the Indiana College Core (ICC).**

Integrated Chemistry and Physics (ICP) is a hands-on, project- and lab-based science course that explores **how things work and what they are made of**. Students will investigate real-world science concepts through topics such as chemical interactions, electricity and magnetism, matter and energy, waves, forces, and motion.

Learning is active and hands-on, with opportunities to conduct experiments, complete computer activities, create projects, participate in discussions and demonstrations, and present findings. Students will also use videos, lectures, and other activities to build a strong understanding of the concepts they are studying.

OPEN TO:	Grades: 10
PREREQUISITES:	Algebra I
FULL YEAR COURSE	

ANATOMY & PHYSIOLOGY • 5276

Anatomy and Physiology is an **advanced science course** that explores the structure and function of the human body. Students will learn how the body is organized, how its major organs and systems work, and how those systems work together to keep us healthy and functioning.

Students will take an in-depth look at major body systems, including their structures, organs, and functions. Learning will include **laboratory activities, technology, and major dissections** that allow students to apply what they learn and better understand the human body.

Because this is an advanced course, students should be prepared to learn and use a large amount of **anatomy and physiology vocabulary**. Strong study skills, attention to detail, and a willingness to participate in laboratory activities will help students succeed.

🔬 **Laboratory Experiences:** Students will participate in laboratory investigations, use technology, and complete major dissections as part of the course.

PRINCIPLES OF BUSINESS MANAGEMENT • 4562 / BUS X100

Explore how businesses are managed—and learn what it takes to make smart business decisions!

What does it take to run a successful business? In this course, students will explore the role of business managers and learn how businesses operate in today's changing world. Topics will include business management, leadership, organization, decision-making, and business operations.

Students will examine how managers guide businesses through everyday challenges while considering the economic, political, and social factors that influence business decisions. Through real-world examples and business scenarios, students will gain a better understanding of how businesses operate, respond to change, and make decisions that affect employees, customers, and communities.

This course is a great choice for students interested in business, management, entrepreneurship, leadership, marketing, finance, or pursuing a career in the business world.

🎓 **Dual Credit Opportunity: This is an Indiana University Bloomington dual credit course. Students may earn college credit while completing their high school coursework.**

🏛️ **Indiana College Core Connection: This course counts toward the Social and Behavioral Ways of Knowing category of the Indiana College Core (ICC).**

⭐ **Weighted Course:** Due to the **advanced content, increased academic rigor, and depth of study**, Anatomy and Physiology is calculated as a **weighted course**.

OPEN TO:	Grades: 10 - 12
PREREQUISITES:	C- of higher in both Biology I and Chemistry I
FULL YEAR COURSE	

Social Studies Department

UNITED STATES GOVERNMENT • 1540/ Y103 ACP

American Government introduces students to **how the U.S. government works and how American politics shape our country**. Students will explore the structure and purpose of the American federal government and examine how power and responsibilities are shared between different levels and branches of government.

Students will also learn about the **development of the U.S. political system and the role of political parties**. The course will help students understand how government decisions are made, how citizens participate in the political process, and how the federal system affects everyday life.

🎓 **Dual Credit:** Students may earn **Indiana University college credit** through the IU Advanced College Project (ACP) program, provided they meet IU ACP eligibility and enrollment requirements.

⭐ **Weighted Course: Because Dual Credit Government includes college-level coursework and increased academic rigor, it is calculated as a weighted course.**

PRINCIPLES OF BUSINESS MANAGEMENT • 4562 / BUS X100

Explore how businesses are managed—and learn what it takes to make smart business decisions!

What does it take to run a successful business? In this course, students will explore the role of business managers and learn how businesses operate in today's changing world. Topics will include business management, leadership, organization, decision-making, and business operations.

Students will examine how managers guide businesses through everyday challenges while considering the economic, political, and social factors that influence business decisions. 🏛️ **Indiana College Core Connection: This course counts toward the Social and Behavioral Ways of Knowing category of the Indiana College Core (ICC).**

🎓 **Indiana College Core: This course is an Indiana College Core-approved course and may count toward the Indiana College Core requirements when applicable.**

🎓 **Graduation Requirement: Dual Credit United States Government can be taken to fulfill the United States Government graduation requirement.**

OPEN TO:	Grades: 12
PREREQUISITES:	2.70 GPA
ONE SEMESTER COURSE	

UNITED STATES GOVERNMENT • 1540

United States Government helps students understand **how our government works, how citizens participate, and how government decisions affect our everyday lives**. Students will explore the principles of constitutional democracy and the rights and responsibilities that come with being a citizen.

Students will study the **U.S. Constitution, branches and levels of government, citizenship, elections, political participation, and the role of individuals and groups in government and civic life**. They will examine how local, state, and national governments are structured and how each level serves its communities.

Students will also explore how the **United States interacts with other countries** and the role the U.S. government plays in world affairs. Using primary and secondary sources, students will research political and civic issues, evaluate information, consider different perspectives, and support their ideas with evidence.

PRINCIPLES OF BUSINESS MANAGEMENT • 4562 / BUS X100

Explore how businesses are managed—and learn what it takes to make smart business decisions!

What does it take to run a successful business? In this course, students will explore the role of business managers and learn how businesses operate in today's changing world. Topics will include business management, leadership, organization, decision-making, and business operations.

Students will examine how managers guide businesses through everyday challenges while considering the economic, political, and social factors that influence business decisions. PRINCIPLES OF BUSINESS MANAGEMENT • 4562 / BUS X100

Explore how businesses are managed—and learn what it takes to make smart business decisions!

What does it take to run a successful business? In this course, students will explore the role of business managers and learn how businesses operate in today's changing world. Topics will include business management, leadership, organization, decision-making, and business operations.

Students will examine how managers guide businesses through everyday challenges while considering the economic, political, and social factors that influence business decisions. Through real-world examples and business scenarios, students will gain a better understanding of how businesses operate, respond to change, and make decisions that affect employees, customers, and communities.

This course is a great choice for students interested in business, management, entrepreneurship, leadership, marketing, finance, or pursuing a career in the business world.

🎓 **Dual Credit Opportunity: This is an Indiana University Bloomington dual credit course. Students may earn college credit while completing their high school coursework.**

🏛️ **Indiana College Core Connection: This course counts toward the Social and Behavioral Ways of Knowing category of the Indiana College Core (ICC).**

This **Indiana University Advanced College Project (IU ACP)** course gives students the opportunity to study U.S. history at a **college level while earning high school credit and potentially Indiana University college credit**.

H105: U.S. History to 1865
H105 explores American history from the **Colonial period through the Civil War**. Students will study the American Revolution, the development of the U.S. government and Constitution, westward expansion, and the growth of American society. Topics also include political, economic, and social change; the experiences of racial and ethnic groups; gender roles; relationships with Native nations and other countries; industrialization; and the development of American ideas and identity.

H106: U.S. History from 1865 to the Present
H106 continues the study of U.S. history from **1865 to the present**. Students will examine Reconstruction, industrialization, urbanization, territorial expansion, wars, social and political change, and the growing role of the United States in world affairs. Students will also explore how economic, political, and social developments have shaped American society and influenced the experiences of different groups.

Throughout both courses, students will examine **primary and secondary sources, historical evidence, and multiple perspectives** to better understand how the United States has changed over time and how historical events continue to influence the nation today.

🎓 **Dual Credit:** Students may earn **Indiana University college credit** through the IU Advanced College Project (ACP) program, provided they meet IU ACP eligibility and enrollment requirements.

🎓 **Indiana College Core: This course is an Indiana College Core-approved course and may count toward the Indiana College Core requirements when applicable.**

🎓 **Graduation Requirement: Dual Credit United States History can be taken to fulfill the United States History graduation requirement.**

🏛️ **Indiana College Core Connection: This course counts toward the Social and Behavioral Ways of Knowing category of the Indiana College Core (ICC).**

World Geography and History takes students on a tour of the world, exploring the people, places, cultures, history, and events that have shaped our world. Students will begin by reviewing important geographic concepts, including the five themes of geography and key vocabulary they will use throughout the course.

Students will explore the world region by region, beginning with the United States and Canada and continuing through Latin America, Europe, Russia, North Africa and the Middle East, Southwest and Central Asia, Africa south of the Sahara, Asia, and finally Australia, Oceania, and Antarctica.

Throughout the course, students will build their map and geographic skills while learning how geography and history influence the way people live and interact. Students will participate in discussions, projects, critical-thinking activities, and meaningful map exercises. Current events will also be incorporated to help students connect what they are learning to the world around them.

🗺️ **Geographic Skills: Students will regularly work with maps and geographic information to better understand the locations, regions, cultures, and events they study.**

📚 **Student Expectations: Students should be prepared to participate in discussions, think critically, read regularly, and write often as they explore why geography and history matter.**

🎓 **Graduation Requirement: World History or Geography can be taken to fulfill the World Perspectives graduation requirement.**

OPEN TO:	Grades: 9 - 10

ONE SEMESTER COURSE	

APPLIED INDIANA STUDIES • 1518A

Indiana Studies explores the history, government, politics, economy, and culture of Indiana while making connections to what is happening across the United States. Students learn how Indiana's history has shaped the policies, laws, communities, and traditions we see today.

PRINCIPLES OF BUSINESS MANAGEMENT • 4562 / BUS X100

Explore how businesses are managed—and learn what it takes to make smart business decisions!

What does it take to run a successful business? In this course, students will explore the role of business managers and learn how businesses operate in today's changing world. Topics will include business management, leadership, organization, decision-making, and business operations.

Students will examine how managers guide businesses through everyday challenges while considering the economic, political, and social factors that influence business decisions. Through real-world examples and business scenarios, students will gain a better understanding of how businesses operate, respond to change, and make decisions that affect employees, customers, and communities.

This course is a great choice for students interested in business, management, entrepreneurship, leadership, marketing, finance, or pursuing a career in the business world.

🎓 **Dual Credit Opportunity: This is an Indiana University Bloomington dual credit course. Students may earn college credit while completing their high school coursework.**

🏛️ **Indiana College Core Connection: This course counts toward the Social and Behavioral Ways of Knowing category of the Indiana College Core (ICC).**

Students examine the roles of **state and local leaders**, how government works, and how citizens can participate in the political process. They also explore important events, ideas, and developments that have shaped Indiana and compare them with national events and changes.

The course may also include **Indiana art and literature** to help students understand the state's history, culture, and unique identity.

🎓 **Alternate Diploma:** This course is available **only to students working toward the Alternate Diploma**.

OPEN TO:	Grades: 10 - 12
APPLIED UNITS:	2 units maximum
FULL YEAR COURSE	Counts as a social studies requirement or elective for the Alternate Diploma.

LAW EDUCATION • 1526

Law Education introduces students to the American legal system and how it is connected to the **U.S. Constitution**. Students learn how laws are created and applied and how the legal system affects their everyday lives.

Students explore their **rights and responsibilities as citizens** and learn practical ways to understand and navigate legal situations. The course also focuses on **communication, conflict resolution, critical thinking, and problem-solving skills** that can help students handle disagreements and work toward positive solutions.

Learning is designed to be hands-on and engaging through **case studies, simulations, field trips, mock trials, and other real-world activities** whenever possible.

⚖️ **Real-World Connections:** Learn how the law affects everyday decisions, rights, and responsibilities.

PRINCIPLES OF BUSINESS MANAGEMENT • 4562 / BUS X100

THEATER PRODUCTION • 4248

Theater Production gives students the opportunity to experience what it takes to bring a show to life—from the first idea to the final performance. Students will explore the many parts of theater production, including **acting, directing, blocking, stage management, props, costumes, marketing, and rehearsal**.

Students will learn how to **read, analyze, and interpret plays** and discover how actors and production teams bring a story and its characters to life. The course follows the different stages of producing a show, including **auditions, read-throughs, blocking, rehearsals, marketing, and performances**.

Students will also work together to create **original scenes, stories, and short plays** and have opportunities to perform their work on stage. During class, students may assist with current theater productions, gaining valuable experience as part of a production team.

As a culminating project, students will take on leadership roles such as **director, actor, or stage manager** and work together to produce a short play for other classes and community members. This student-led performance gives students the opportunity to build **creativity, confidence, teamwork, communication, and leadership skills** while helping strengthen connections between the school and community.

🎭 **Behind the Scenes:** Discover everything that goes into creating a successful theater production.

🎬 **Create & Perform:** Develop original scenes and short plays and bring them to life on stage.

⭐ **Student Leadership:** Take on important production roles and help lead a performance from start to finish.

🤝 **Community Connection:** Share student-led performances with classmates and community members.

SPANISH IV • 2126

Spanish IV gives students the opportunity to take their Spanish skills to a more advanced level while using the language in meaningful, real-world situations. Students will build on their previous Spanish coursework and become more confident communicating through **speaking, listening, reading, and writing**.

Students will practice strategies that help them communicate even when they do not know every word, such as **describing an idea in a different way, using context clues, recognizing word patterns, and using familiar words to understand new vocabulary**. These strategies help students communicate more naturally and expand their Spanish vocabulary.

Culture is an important part of the course. Students will explore the **traditions, products, perspectives, and values** of Spanish-speaking communities and examine the factors that influence cultural practices. They will compare Spanish-speaking cultures with their own experiences and reflect on how culture shapes the way people communicate and understand the world.

Students will also make connections between Spanish and other subjects through projects and activities that combine **language, culture, and real-world topics**. They will explore how Spanish is used in their own communities and learn to identify and evaluate resources created for Spanish-speaking audiences.

🗣️ **Communicate with Confidence:** Use Spanish more independently in conversations and written communication.

📚 **Expand Your Vocabulary:** Learn strategies for understanding unfamiliar words and expressing ideas when you don't know the exact word you need.

PRINCIPLES OF BUSINESS MANAGEMENT • 4562 / BUS X100

Explore how businesses are managed—and learn what it takes to make smart business decisions!

What does it take to run a successful business? In this course, students will explore the role of business managers and learn how businesses operate in today's changing world. Topics will include business management, leadership, organization, decision-making, and business operations.

Students will examine how managers guide businesses through everyday challenges while considering the economic, political, and social factors that influence business decisions. Through real-world examples and business scenarios, students will gain a better understanding of how businesses operate, respond to change, and make decisions that affect employees, customers, and communities.

This course is a great choice for students interested in business, management, entrepreneurship, leadership, marketing, finance, or pursuing a career in the business world.

🎓 **Dual Credit Opportunity: This is an Indiana University Bloomington dual credit course. Students may earn college credit while completing their high school coursework.**

🏛️ **Indiana College Core Connection: This course counts toward the Social and Behavioral Ways of Knowing category of the Indiana College Core (ICC).**

🌎 **Explore Culture:** Investigate the traditions, perspectives, values, and practices of Spanish-speaking communities.

🔄 **Compare Cultures:** Explore similarities and differences between Spanish-speaking cultures and your own experiences.

🌟 **Real-World Connections:** Discover how Spanish is used in local communities, careers, media, and everyday life.

🎓 **College & Career Preparation:** Develop advanced communication and cultural skills that can be useful in college, careers, travel, and future opportunities.

OPEN TO:	Grades: 11 - 12
PREREQUISITES:	Spanish I, Spanish II, and Spanish III with a C or higher
FULL YEAR COURSE	

Central Nine Career Center

Central Nine Career Center (C9) gives students the opportunity to gain hands-on career skills and real-world experience while still completing their high school diploma. C9 programs can help prepare students for employment, college or technical training, or both.

🤷‍♀️ Who Can Attend?

Central Nine programs are available to juniors and seniors. Students are selected based on factors such as interest in the program, skills and aptitude, attendance, and previous academic performance.

🛠️ What Can I Earn?

PRINCIPLES OF BUSINESS MANAGEMENT • 4562 / BUS X100

Explore how businesses are managed—and learn what it takes to make smart business decisions!

What does it take to run a successful business? In this course, students will explore the role of business managers and learn how businesses operate in today's changing world. Topics will include business management, leadership, organization, decision-making, and business operations.

Students will examine how managers guide businesses through everyday challenges while considering the economic, political, and social factors that influence business decisions. This course is a great choice for students interested in business, management, entrepreneurship, leadership, marketing, finance, or pursuing a career in the business world.

🎓 **Dual Credit Opportunity: This is an Indiana University Bloomington dual credit course. Students may earn college credit while completing their high school coursework.**

🏛️ **Indiana College Core Connection: This course counts toward the Social and Behavioral Ways of Knowing category of the Indiana College Core (ICC).**

Students can earn up to 4 high school credits per semester by successfully completing their C9 program requirements.

🚌 What Does My Schedule Look Like?

Students spend approximately half of the school day at Central Nine learning in their career program. The rest of the school day is spent at Indian Creek High School, where students complete graduation requirements and can participate in extracurricular activities.

💰 Are There Additional Costs?

Central Nine charges an annual program fee that helps cover items such as equipment, tools, materials, and books. Program fees and specific costs vary by program.

📞 ***Questions? Contact Central Nine Career Center at 317-888-4401 for information about programs, fees, and enrollment.***

📚 ***Important: Program offerings, requirements, fees, and other details may change. Students should refer to the most current Central Nine Course Catalog for the latest information.***

CONSTRUCTION & LANDSCAPING

Explore how businesses are managed—and learn what it takes to make smart business decisions!

What does it take to run a successful business? In this course, students will explore the role of business managers and learn how businesses operate in today's changing world. Topics will include business management, leadership, organization, decision-making, and business operations.

Students will examine how managers guide businesses through everyday challenges while considering the economic, political, and social factors that influence business decisions. Through real-world examples and business scenarios, students will gain a better understanding of how businesses operate, respond to change, and make decisions that affect employees, customers, and communities.

This course is a great choice for students interested in business, management, entrepreneurship, leadership, marketing, finance, or pursuing a career in the business world.

🎓 **Dual Credit Opportunity: This is an Indiana University Bloomington dual credit course. Students may earn college credit while completing their high school coursework.**

🏛️ **Indiana College Core Connection: This course counts toward the Social and Behavioral Ways of Knowing category of the Indiana College Core (ICC).**

Construction Trades is a hands-on program for students interested in learning how buildings and homes are designed, built, and finished. Students learn through a combination of **classroom instruction, laboratory activities, and real construction projects**.

Students develop practical skills in areas such as **carpentry, framing, installation, construction techniques, and job-site safety**. One of the highlights of the program is the opportunity to put these skills into practice by **helping construct a house**.

Students also gain valuable **work-ready skills** and opportunities to connect with local construction professionals and community partners. The program helps students prepare for careers in construction and related trades while building skills that can also be useful for future college or technical training.

Students will also have the opportunity to earn **OSHA certification**, helping them become better prepared for the expectations of a professional construction job site.

🏗️ Year 1

- **Principles of Construction Trades — 7130**
- **Construction Trades: General Carpentry — 7123**
- **Construction Trades: Technical Skills Development — 7156**

🔨 Year 2

- **Construction Trades: Framing and Finishing — 7122**
- **Construction Trades Capstone — 7242**

🛠️ **Hands-On Learning:** Learn construction skills by working on real projects.

🏠 **Build a House:** Put your skills to work as part of a team constructing a home.

HEALTH SCIENCE

PRINCIPLES OF BIOMEDICAL SCIENCES:

Biomedical Sciences is an exciting, hands-on program for students interested in **health care, medicine, science, and the human body**. Students learn through engaging **activities, projects, and real-world problems** while exploring a variety of biomedical careers.

From the very beginning, students are immersed in a **crime scene investigation** and use science to solve problems and uncover clues. Throughout the program, students explore topics such as **forensic science, human body systems, medical interventions, disease, and patient care**.

Students gain hands-on experience with activities such as **autopsies, drug analysis, EKGs, Clay Manikins®, prosthetic design, and other medical investigations and simulations**. These experiences allow students to apply what they learn while developing skills in critical thinking, problem-solving, teamwork, and scientific investigation.

The program is a great opportunity for students who are considering careers in **medicine, nursing, health care, biotechnology, forensic science, or other STEM-related fields**.

🏛️ **Indiana College Core Connection: This course counts toward the Social and Behavioral Ways of Knowing category of the Indiana College Core (ICC).**

Medical Assistant (CCMA) is a **one-year pathway** for students interested in exploring careers in **health care and medical assisting**. Students learn about the human body and how it functions while developing practical skills used in medical offices, clinics, and other health care settings.

Students get hands-on experience with skills they may use as a medical assistant, including **taking vital signs, performing ECGs, completing urinalysis, preparing syringes, practicing venipuncture, calculating medication dosages, and learning about prescription writing**. Students also explore how medical assistants respond to common patient needs and triage situations in a professional health care setting.

The program helps students build **career-ready skills, confidence, and professional knowledge** while preparing for additional education or employment in health care.

🩺 One-Year Pathway

Students complete the following courses during the **one-year program**:

- **Principles of Healthcare — 7168**
- **Medical Terminology — 5274**
- **Certified Clinical Medical Assistant (CCMA) — 7164**

🩹 **Hands-On Medical Skills:** Practice taking **blood pressure, pulse, respiration, and temperature**, along with ECGs, urinalysis, venipuncture, and other clinical skills.

🧬 **Explore the Human Body:** Learn about the body's systems and how they work together.

💊 **Real-World Health Care:** Explore patient care, triage situations, dosage calculations, and other responsibilities of a medical assistant.

🏆 **Industry Certifications:** Students may have opportunities to earn **CPR, HIPAA, FEMA, NHA CCMA, and Bloodborne Pathogens certifications**.

What does it take to run a successful business? In this course, students will explore the role of business managers and learn how businesses operate in today's changing world. Topics will include business management, leadership, organization, decision-making, and business operations.

Students will examine how managers guide businesses through everyday challenges while considering the economic, political, and social factors that influence business decisions. Through real-world examples and business scenarios, students will gain a better understanding of how businesses operate, respond to change, and make decisions that affect employees, customers, and communities.

This course is a great choice for students interested in business, management, entrepreneurship, leadership, marketing, finance, or pursuing a career in the business world.

🎓 **Dual Credit Opportunity: This is an Indiana University Bloomington dual credit course. Students may earn college credit while completing their high school coursework.**

🏛️ **Indiana College Core Connection: This course counts toward the Social and Behavioral Ways of Knowing category of the Indiana College Core (ICC).**

🎓 **Career Exploration:** Explore careers in **veterinary medicine, animal health, animal care, and related fields**.

📌 **Important:** Students interested in becoming **Certified Veterinary Assistants** can continue into a second-year option that includes a **year-long internship** and additional capstone coursework.

OPEN TO:	Grades: 11 - 12
PREREQUISITES:	Application
FULL YEAR COURSE	

HUMAN SERVICES

COSMETOLOGY :

Cosmetology is a **two-year pathway** for students interested in careers in **cosmetology, hair styling, barbering, and the beauty industry**. The program is designed for students in their **junior and senior years** and is offered in partnership with **Paul Mitchell The School**.

Students attend classes on the **Paul Mitchell The School campus**, giving them the opportunity to learn in a professional cosmetology environment. Through classroom instruction and hands-on practice, students develop practical skills used in the beauty industry, including **shampooing, roller control, quick styling, hair coloring, and other cosmetology techniques**.

Throughout the two-year program, students build their technical skills, professionalism, communication, and confidence while preparing for a career in the beauty industry. Students will also have the opportunity to work toward earning their **Indiana state cosmetology license**.

PRINCIPLES OF BUSINESS MANAGEMENT • 4562 / BUS X100

Explore how businesses are managed—and learn what it takes to make smart business decisions!

What does it take to run a successful business? In this course, students will explore the role of business managers and learn how businesses operate in today's changing world. Topics will include business management, leadership, organization, decision-making, and business operations.

Students will examine how managers guide businesses through everyday challenges while considering the economic, political, and social factors that influence business decisions. 💇 Two-Year Pathway

Year 1

- **Principles of Barbering and Cosmetology — 7330**
- **Barbering and Cosmetology Fundamentals — 7331**
- **Advanced Cosmetology — 7332**

Year 2

- **Barbering and Cosmetology Capstone — 7334**

✂️ **Hands-On Training:** Practice real cosmetology skills such as **shampooing, roller control, quick styling, hair coloring, and more**.

🏫 **Professional Environment:** Learn on the **Paul Mitchell The School campus** and experience a professional cosmetology training setting.

💇 **Career Exploration:** Explore careers in **cosmetology, barbering, hair styling, salons, and the beauty industry**.

🏆 **State License Opportunity:** Complete the required training and work toward earning your **Indiana state cosmetology license**.

🎓 **Two-Year Commitment:** This pathway is designed to be completed during your **junior and senior years**.

CULINARY ARTS AND HOSPITALITY :

Culinary Arts and Hospitality is a **one- to two-year pathway** for students interested in **food, cooking, baking, restaurants, hospitality, and customer service**. Students gain real-world experience by helping operate **To The Nines**, Central Nine's campus restaurant, and the **Central Kitchen**.

Students learn how the food and hospitality industry works while developing skills used in professional kitchens and restaurants. Through hands-on experiences, students explore **food safety and sanitation, kitchen organization, food identification, nutrition, baking, cooking, customer service, and restaurant operations**.

Students also have opportunities to **cross-train in a variety of front-of-the-house and back-of-the-house positions**. This allows them to experience different jobs and responsibilities while building teamwork, communication, time management, and workplace skills.

🍳 Year 1

- **Principles of Culinary and Hospitality — 7173**
- **Nutrition — 7171**
- **Culinary Arts — 7169**

🥐 Year 2

- **Culinary Arts Capstone — 7233**
- **Baking and Pastry Capstone — 7235**

📌 **Pathway Requirement:** Students only need to successfully complete **one year of the program** to fulfill the pathway requirement. Students who choose to continue into a second year can build additional skills and experience through advanced culinary and baking courses.

PRINCIPLES OF BUSINESS MANAGEMENT • 4562 / BUS X100

FULL YEAR COURSE	

MANUFACTURING

PRECISION MACHINING:

Precision Machining is a **two-year pathway** for students interested in manufacturing, engineering, mechanics, and working with advanced machinery. Students learn how to turn raw materials into precise, finished products while developing technical skills used in today's manufacturing industry.

PRINCIPLES OF BUSINESS MANAGEMENT • 4562 / BUS X100

Explore how businesses are managed—and learn what it takes to make smart business decisions!

What does it take to run a successful business? In this course, students will explore the role of business managers and learn how businesses operate in today's changing world. Topics will include business management, leadership, organization, decision-making, and business operations.

Students will examine how managers guide businesses through everyday challenges while considering the economic, political, and social factors that influence business decisions. Through real-world examples and business scenarios, students will gain a better understanding of how businesses operate, respond to change, and make decisions that affect employees, customers, and communities.

This course is a great choice for students interested in business, management, entrepreneurship, leadership, marketing, finance, or pursuing a career in the business world.

🎓 **Dual Credit Opportunity: This is an Indiana University Bloomington dual credit course. Students may earn college credit while completing their high school coursework.**

🏛️ **Indiana College Core Connection: This course counts toward the Social and Behavioral Ways of Knowing category of the Indiana College Core (ICC).**

Students get **hands-on experience with industry equipment**, including **bench grinders, mills, lathes, drill presses, belt sanders, and computer numerical control (CNC) machines**. Students learn CNC programming and operation while completing a variety of projects that build accuracy, problem-solving, measurement, and machining skills.

In the second year, students have the opportunity to participate in a **paid internship** and gain valuable experience in a real manufacturing environment. Students may also work toward **National Institute for Metalworking Skills (NIMS) certification**, an industry-recognized credential.

🛠️ Two-Year Pathway

Year 1

- Principles of Precision Machining — 7109
- Precision Machining Fundamentals — 7105
- Technical Skills Development: Precision Machining — 7164

Year 2

- Advanced Precision Machining — 7107
- Precision Machining Capstone — 7219

⚙️ **Hands-On Skills:** Learn to safely operate **mills, lathes, drill presses, grinders, belt sanders, and CNC equipment**.

💻 **CNC Technology:** Learn the basics of **computer numerical control programming and machine operation**.

💼 **Paid Internship Opportunity:** Second-year students may have the opportunity to gain **paid, real-world work experience** in the manufacturing industry.

PRINCIPLES OF BUSINESS MANAGEMENT • 4562 / BUS X100

OPEN TO:	Grades: 11 - 12
PREREQUISITES:	Algebra I & geometry recommended, application
FULL YEAR COURSE	

WELDING TECHNOLOGY:

Welding Technology is a **one-year pathway with an optional second year** for students interested in hands-on work, manufacturing, construction, automotive, and other skilled trades. Welding skills are used in many industries, including **automotive, construction, manufacturing, shipbuilding, oil and gas, and transportation**.

Students learn how to safely use welding equipment and develop skills through hands-on projects. Welding processes covered include **GMAW (MIG), GTAW (TIG), SMAW (Stick), oxy-acetylene cutting, and plasma hand and CNC cutting**. Students build skills in welding, cutting, equipment operation, measurement, safety, and problem-solving.

Students who complete the first year can fulfill the pathway requirement. Those who choose to continue into a second year can develop more advanced welding skills and gain additional hands-on experience through specialized courses and a capstone experience.

🔥 One- to Two-Year Pathway

Year 1 — Pathway Completion

PRINCIPLES OF BUSINESS MANAGEMENT • 4562 / BUS X100

🏛️ **Indiana College Core Connection: This course counts toward the Social and Behavioral Ways of Knowing category of the Indiana College Core (ICC).**

CRIMINAL JUSTICE:

Criminal Justice is a **two-year pathway** for students interested in careers in **law enforcement, corrections, probation, courts, and other areas of the criminal justice system**. This hands-on, training-intensive program introduces students to the skills, responsibilities, and professional expectations of criminal justice careers.

Students participate in **academy-style training modeled after the Indiana Law Enforcement Academy (ILEA)**. The program emphasizes professionalism, integrity, physical fitness, teamwork, communication, and personal responsibility while helping students understand the standards expected in criminal justice careers.

Students explore topics such as **arrests, use-of-force procedures, report writing, communications, terrorism and counterterrorism awareness, court operations, corrections, probation, and cultural awareness**. Through classroom instruction, hands-on activities, and practical training, students build skills that can prepare them for further education, academy training, or careers in criminal justice.

👮 Two-Year Pathway

Year 1

- Principles of Criminal Justice — 7193
- Law Enforcement Fundamentals — 7191
- Technical Skills Development: Criminal Justice — 7156

Year 2

- Corrections and Cultural Awareness — 7188
- Criminal Justice Capstone — 7231

🏃 **Physical Training:** Participate in physical training modeled after **Indiana Law Enforcement Academy (ILEA) standards**.

What does it take to run a successful business? In this course, students will explore the role of business managers and learn how businesses operate in today's changing world. Topics will include business management, leadership, organization, decision-making, and business operations.

Students will examine how managers guide businesses through everyday challenges while considering the economic, political, and social factors that influence business decisions. Through real-world examples and business scenarios, students will gain a better understanding of how businesses operate, respond to change, and make decisions that affect employees, customers, and communities.

This course is a great choice for students interested in business, management, entrepreneurship, leadership, marketing, finance, or pursuing a career in the business world.

🎓 **Dual Credit Opportunity: This is an Indiana University Bloomington dual credit course. Students may earn college credit while completing their high school coursework.**

🏛️ **Indiana College Core Connection: This course counts toward the Social and Behavioral Ways of Knowing category of the Indiana College Core (ICC).**

- **Principles of Healthcare** — 7168
- **Medical Terminology** — 5274
- **Emergency Medical Technician** — 7165

🎓 **Senior Only:** This program is available **only to high school seniors**.

🚨 **Real-World Training:** Practice responding to **realistic emergency and patient-care situations** similar to those encountered in emergency rooms and ambulatory care.

🩺 **Hands-On Healthcare Skills:** Develop skills in **patient care, emergency response, medical terminology, communication, and professionalism**.

🏅 **NREMT Opportunity:** Students may have the opportunity to earn **NREMT certification** after successfully passing the required examination.

🚀 **Career Ready:** Explore careers in **Emergency Medical Services, emergency medicine, healthcare, and related fields**.

OPEN TO:	Grades: 12
PREREQUISITES:	Application
FULL YEAR COURSE	

FIRE AND RESCUE:

Fire and Rescue is a **one-year pathway** for students interested in careers in **firefighting, emergency response, public safety, and emergency services**. Students have the unique opportunity to work toward a high school diploma while also earning **four state fire certifications, including Hazmat**.

PRINCIPLES OF BUSINESS MANAGEMENT • 4562 / BUS X100

Explore how businesses are managed—and learn what it takes to make smart business decisions!

What does it take to run a successful business? In this course, students will explore the role of business managers and learn how businesses operate in today's changing world. Topics will include business management, leadership, organization, decision-making, and business operations.

Students will examine how managers guide businesses through everyday challenges while considering the economic, political, and social factors that influence business decisions. Through real-world examples and business scenarios, students will gain a better understanding of how businesses operate, respond to change, and make decisions that affect employees, customers, and communities.

This course is a great choice for students interested in business, management, entrepreneurship, leadership, marketing, finance, or pursuing a career in the business world.

🎓 **Dual Credit Opportunity: This is an Indiana University Bloomington dual credit course. Students may earn college credit while completing their high school coursework.**

🏛️ **Indiana College Core Connection: This course counts toward the Social and Behavioral Ways of Knowing category of the Indiana College Core (ICC).**

The program is taught by **career firefighters from the local area** who provide hands-on instruction in both physical training and fire academy requirements. Students learn and practice skills such as **search and rescue, victim removal, fire suppression, fire ground operations, and emergency response procedures**.

Students are issued **professional firefighting gear** and gain hands-on experience working with the campus fire engine and **Self-Contained Breathing Apparatus (SCBA)** equipment. Throughout the program, students learn and practice the fire ground operations that firefighters use every day.

🚒 One-Year Pathway

- **Principles of Fire Fighting** — 7195
- **Fire Fighting Fundamentals** — 7189
- **Advanced Fire Fighting** — 7186

🏅 **Earn Fire Certifications:** Students have the opportunity to earn **four state fire certifications**, including **Hazmat**, while completing the pathway.

👩‍🚒 **Learn from Professionals:** Train with **career firefighters from the local area** who bring real-world experience into the classroom and training environment.

🔥 **Hands-On Training:** Practice **fire suppression, search and rescue, victim removal, and fire ground operations**.

🧯 **Professional Equipment:** Use **firefighting gear, a campus fire engine, and SCBA equipment** while learning proper operation and safety procedures.

💪 **Physical Training:** Participate in physical training and activities designed to help students meet **fire academy expectations**.

🚨 **Career Ready:** Build practical skills and experience for careers in **firefighting, emergency response, public safety, and related fields**.

TRANSPORTATION

AUTO COLLISION REPAIR:

Auto Collision Repair is a **one-year pathway with an optional second year** for students interested in automotive repair, body work, painting, and hands-on technical careers. Students learn how damaged vehicles are repaired and how to safely return them to their **pre-accident condition**.

Students gain hands-on experience with a variety of **auto collision repair techniques**, including **metal and plastic repair, painting, MIG welding, plasma cutting, and cost estimation**. Safety is a major focus as students learn to use tools and equipment properly and follow professional repair procedures.

Students who complete the first year can fulfill the pathway requirement. Students who choose to continue into a second year can build additional skills through a **Collision Repair Capstone** experience.

🚗 One- to Two-Year Pathway

Year 1 — Pathway Completion

- **Principles of Collision Repair** — 7215
- **Automotive Body Repair** — 7204
- **Plastic Body Repair and Painting Fundamentals** — 7206

Year 2 — Advanced Experience

- **Collision Repair Capstone** — 7380

Explore how businesses are managed—and learn what it takes to make smart business decisions!

What does it take to run a successful business? In this course, students will explore the role of business managers and learn how businesses operate in today's changing world. Topics will include business management, leadership, organization, decision-making, and business operations.

Students will examine how managers guide businesses through everyday challenges while considering the economic, political, and social factors that influence business decisions. Through real-world examples and business scenarios, students will gain a better understanding of how businesses operate, respond to change, and make decisions that affect employees, customers, and communities.

This course is a great choice for students interested in business, management, entrepreneurship, leadership, marketing, finance, or pursuing a career in the business world.

🎓 **Dual Credit Opportunity: This is an Indiana University Bloomington dual credit course. Students may earn college credit while completing their high school coursework.**

🏛️ **Indiana College Core Connection: This course counts toward the Social and Behavioral Ways of Knowing category of the Indiana College Core (ICC).**
