

IMMUNIZATION INFORMATION FOR STUDENTS ENTERING THE 6TH GRADE OF SCHOOL

January 19, 2016

Dear Parent/Guardian of 5th Grade Students,

Students entering the 6th grade of school must have the following three additional immunizations:

- Tdap,
- Meningococcal
- 2nd Varicella.

Many students in the 5th grade have already received their 2nd Varicella. However, very few have received the Tdap and Meningococcal.

The Tdap and Meningococcal immunizations may be given, to your child, any time after your child turns 11 years of age.

By Indiana Law, your child may be excluded from school following the first day of school attendance, which is August 10, 2016, without proof of the needed immunizations.

When your child receives the needed immunizations, please send the medical documentation to your child's school nurse. This will assist the nurse in getting your child's record updated and alleviate unnecessary phone calls and a potential exclusion from school, on August 11, 2016.

If you have any questions, please call me: CCUS at 765-732-3183 or LES 765-458-5521.

Sincerely,

Charlene Irrgang RN
Corporation Nurse
