

Prevent the flu. It's worth a shot.

We may not have a vaccine for COVID-19 yet, but we do have a vaccine for the flu.

If we get a wave of COVID-19 cases at the same time as flu cases, our hospitals could become too crowded.

Protect yourself and your loved ones.
Get a flu shot.

Prevent the flu. It's worth a shot.

Everyone older than 6 months should get a flu shot.

The flu shot has been shown to prevent hospitalizations, serious illness and even death.

Protect yourself and your loved ones.
Get a flu shot.

Prevent the flu. It's worth a shot.

If you catch the flu, fighting it weakens your immune system.

A weak immune system can increase your risk of more serious diseases, like COVID-19.

Protect yourself and your loved ones.
Get a flu shot.

Prevent the flu. It's worth a shot.

Hoosiers, we have done a great job of managing COVID-19.

Let's continue the good work by keeping both flu AND COVID-19 rates low in the coming months.

Protect yourself and your loved ones.
Get a flu shot.
