***Stack Testing Environmental Technician, Air Analysis Services Division***  
Indianapolis, IN – Corporate Office

Wilcox Environmental Engineering has an opening for a stack testing environmental technician at its Indianapolis location. Qualified candidates will be able to interact with clients, both in the field and office, while preparing for testing and completing reports in accordance with applicable USEPA methods. Testing will be performed outdoors in all types of weather. Applicants must possess the ability to work from heights up to and above 50 feet.

This position requires well-developed skills in writing; organization; data management; attention to detail; the ability to simultaneously manage multiple project tasks; and strong communication, administrative, and computer skills. A willingness to learn is essential. The position also involves project-related overnight traveling, which, from time to time, may be for extended periods.

**Benefits**

Wilcox offers a comprehensive benefits package including Medical, Dental, and Vision, Life Insurance and Short and Long Term Disability, and 401(k) plan.

**To Apply**
