Family— husband- Josh son- Jack (5) son- Ivan (3)

Where do you live— Greenwood

What is your favorite LJC moment or lesson to date— I have loved every moment of my time with LJC and have learned so much; both about myself and others. However, the best part of this program are the relationships I have made and the comradery among the other members in my class.

Number one skill you practice that makes you successful— Empathy & gratitude.

Favorite quote— “It is not the critic who counts; not the man who points out how the strong man stumbles, or where the doer of deeds could have done them better. The credit belongs to the man who is actually in the arena, whose face is marred by dust and sweat and blood; who strives valiantly; who errs, who comes short again and

again, because there is no effort without error and shortcoming; but who does actually strive to do the deeds; who knows great enthusiasms, the great devotions; who spends himself in a worthy cause; who at the best knows in the end the triumph of high achievement, and who at the worst, if he fails, at least fails while daring greatly.” - *Theodore Roosevelt*

Hobbies and interests outside of work—I love to volunteer & be involved in my community. In 2016 I started the group Neighbors of West Old Town Greenwood in an effort to build relationships between my neighbors and restore old fashioned community gatherings that we no longer see these days. I have loved being a part of our progressive dinners, block parties, ice cream socials, etc. and seeing friendships and connections blossom. Being a former elementary teacher here in Greenwood, I also serve on the board for the Greenwood Education Foundation and enjoy helping teachers find funding opportunities to implement unique & engaging curriculum in their classrooms.

Franklin College Department of Mathematics Receives National Honor

Franklin College announced that its mathematics and computing department has been awarded a prestigious national honor by the American Mathematical Society (AMS). The society, after a review of the department's programs, has recognized the college as the recipient of its 2019 Award for an Exemplary Program or Achievement in a Mathematics Department.

"In the arena of higher education programs in mathematics, the prestige of this award is beyond compare," said Lori Schroeder, provost and dean of Franklin College. "This award is highly coveted and is sought after by thousands of colleges and universities across the nation, and it is rare for a small, liberal arts college to be chosen in the face of so many large university mathematics programs. We are so very proud of our faculty for garnering this singular recognition."
