

Dane,

Just wanted to say how much we appreciated the great work your company did on our project.

From the time we first met in the initial planning phase, until the completion of the project, it was obvious you were true professionals in your field. We had no idea what to expect when we started renovation's on a 40 year old building. We also asked you to work around the fact that we would be occupied during the project. All of our request were met with the ease of a company that not only knows how to sell and install a product but understands the safety and security needs of a correctional facility.

I cannot say enough about Bill and Lew the onsite team. Those guys worked with us to develop a day to day plan that was absolutely flawless. There work ethic is unmatched, if we ran into a problem, they imminently resolved it and continued. Again they not only understand there business, they understood ours ,that kept both sides operating as normal.

I would highly recommend Pauly Jail Building Co. and would be happy to show any potential clients their finished project.

Thank You

Jail Admin. Tim Megginson
