

LEGO CLUB

This week's theme is Marble Mazes! See the samples below or get creative and build your own maze! Share your LEGO creations with us as a comment to our LEGO Club video post!

LET'S BUILD A LEGO MARBLE RUN

You do not need a giant collection of bricks to build a marble tracks, but you do need marble or two. Build it simple or build it extreme, but do not lose your marbles over it! This Lego marble run is so easy to build and super fun to play with for quite a few ages, at least 5 to 70 to be exact!

Here is what you need:

- Basic LEGO bricks
- Marbles
- LEGO Base Plate

Build your Maze:

Now grab your pieces and let's get started! The key to success is to make sure the marble can fit everywhere you want it to fit!

The best way to start your LEGO marble run is to build a frame around the outside of the baseplate leaving two holes, one for the start and one for the finish. Use your marble to measure as you go!

Add a piece, remove a piece, you might find a corner too tight for the marble to roll through, so you will need to rethink the design and change it around!
