

# LEGO CLUB

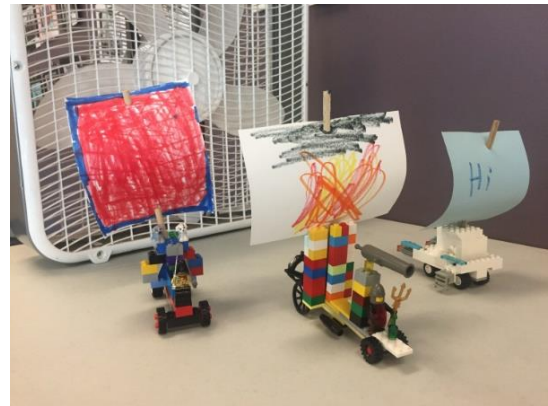

This week's theme is wind-powered cars and boats.

## LET'S BUILD A CAR & BOAT

An idea to get started! Be sure your car has wheels and that your boat can float. Both vehicles need a mast to hold a sail on.

### Here is what you need:

- Basic LEGO bricks
- Wheels
- Pencils
- Cardstock
- Fan
- Straws

### Build your car and boat:

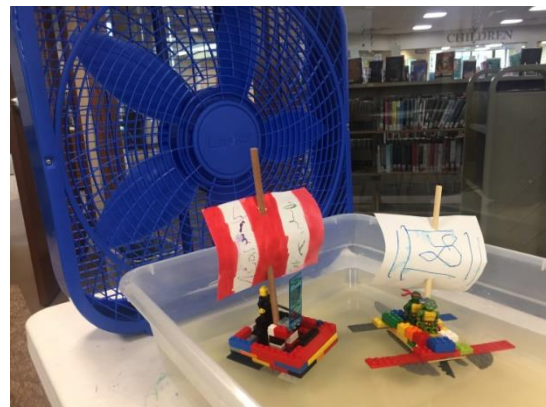

Get Building! Your car can be designed however you like but you need to have a place for the sail.

Watch this video for inspiration

[https://youtu.be/\\_UxLTSIgygA](https://youtu.be/_UxLTSIgygA)

Using a box fan or small table fan (with adult supervision...) see how far your car or boat will go.

Now try blowing through a straw to see how far your car or boat will go with wind power!
