

Introducing PacRx Medication Packaging Program

...from your friends at DeKalb Health PharmaCare

It's a pill box

Medication in a convenient plastic bubble.

It's a schedule

With the medication pre-packaged, you are always on schedule.

It's peace of mind

Patients, family members, and care givers will be able to rest knowing that the medication was taken properly and at the right time.

- ▶ The service is offered for a \$25 monthly fee (charged when the first package is delivered each month)
- ▶ One week's worth of medications will be available for pick up or delivery every Friday. Delivery occurs Friday between 2pm and 6pm. Otherwise, packages will be available for pickup Friday after 2pm.
- ▶ If the designated address is within Auburn, Garrett or Waterloo city limits, delivery is offered at no additional charge. (Requests for prescriptions to be packaged and/or delivered on days other than Friday will include a delivery charge of \$15)
- ▶ Medications are packaged by day and time of administration (Sunday through Saturday at morning, noon, evening, and bedtime)

PacRx Questions?

Please Contact: Rachel or Lori

THE BENEFITS OF THE PROGRAM FOR PATIENTS AND/OR CAREGIVERS INCLUDE:

Safety

The patient gets the correct medication at the proper times. No double dosing or missed doses.

Adherence

It is easy to see if the medications were taken, and if there were any missed doses.

Professional Monitoring

The pharmacy staff will fill your prescriptions and call you if you forget to pick up your medication, or deliver your medications to you.

Convenience

No more frustrations with trying to organize your medications on your own. No more guessing when to take your medications.

WE RECOMMEND PacRx FOR ANYONE WHO WANTS TO ENSURE THEY ARE TAKING THEIR MEDICATIONS CORRECTLY, INCLUDING:

- ▶ Patients taking 3+ medications multiple times per day
- ▶ Patients unable to administer medications to themselves and are being cared for by a family member or caregiver
- ▶ Seniors on chronic medications
- ▶ Patients with memory impairment
