RE: Riverbend Correctional Facility, Milledgeville, GA

Dear Bob:

I would like to take this opportunity to thank you and your team for the extraordinary work performed on the Riverbend Correctional Facility Project. This was a very challenging project for our team and we could not have been successful without dedicated contractors like you. The project was challenging and very fast paced, but your team met all the challenges we faced and are a key reason the project was a success.

Your team took on a lot of responsibility to make sure this project was successful for our client. From the first day you and Jared showed a level of ownership in the entire process that was critical to the project's success. Jared proved to not only be knowledgeable of the multitude of scopes he was responsible for coordinating, but a great team player, by taking initiative to coordinate with other trades to get the job done and also making sure that the right solution was implemented for the client. Jared was excellent at keeping up with everything and staying in constant communication with the team. On site, Anthony proved once again, that he can out work everyone on site while still maintaining the highest level on quality. As always, your team is a pleasure to work with. You are an asset to the overall project team in everything you do and always have the client's interests at heart.

We are only as strong as the people we surround ourselves with. It is so important on a project like this that we have team members that take ownership, and always bring forward solutions when problems are encountered. We could not have done this without your team. Our team cannot thank you enough for your commitment to meeting the goals of our client on this project. This project is added to what is already a long list of successful projects we have completed together, with many more to come.

Sincerely,
NEW SOUTH CONSTRUCTION COMPANY
