## Montgomery County Community Foundation Post Grant Report

Part of MCCF's responsibility in awarding grants for the improvement of our community is tracking the success and ultimate effect of those grants.

MCCF requires a simple reporting procedure of all grant applicants in order to define the impact of grants over time. The evaluation will also be a valuable tool in determining the value of making future grants to particular organizations. The timeliness and quality of the final reports will be factors in evaluating the grantee for future funding. All requirements for past grants must be current in order to be eligible for another grant.

To complete the required post grant report regarding the use of the granted funds, please answer the following questions along with requested attachments and submit to MCCF by the date requested in the award letter.

Organization	
Award Amount	
Address
