

EXPERIMENTS! DEMOS!

DISASTERS?

CREATE GLOW IN THE DARK ITEMS AT HOME!

What you need:

- Clear glass or cup
- Tonic water
- Vitamin B
- Fluorescent paint
- Water
- Stirrer
- Black light
- Glow paint

How you do it:

Glow jar: Paint jar or other item with glow paint. Let charge in sunlight. Watch it glow in the dark.

Black Light Glow Liquids:

Gather three clear glasses. Pour tonic water into one. Put regular water into the other two. Add fluorescent paint into one glass. Mix with water. If your vitamin b is already in powder form, empty it into the third glass of water. If it is solid, crush with rolling pin, hammer, or other tool. Add the powder to the water. Stir. Turn on black light. Enjoy the glow. If you wish, paint with the fluorescent water.

Further extensions:

Experiment with water to paint and vitamin B ratio.

Try various temperatures of water

Try different brands of fluorescent paint

Try different brands or kinds of vitamin b

Try changing the color by adding food coloring

Try adding both vitamin b and fluorescent paint to the same glass
