LEADING BEYOND THE ALGORITHM: HUMAN-CENTERED LEADERSHIP IN THE AGE OF AI

Artificial intelligence is transforming how leaders make decisions, communicate, develop teams, and drive innovation, but technology alone doesn't create great leadership. This engaging and practical session explores how today's leaders can harness AI as a strategic partner while strengthening the uniquely human skills that matter most: vision, emotional intelligence, ethics, creativity, and trust. Attendees will discover practical AI tools to improve productivity, streamline decision-making, enhance communication, and support coaching, while learning how to lead organizations through rapid technological change with confidence and integrity. Whether you're an experienced executive or an emerging leader, you'll leave with actionable strategies to become a more effective, future-ready leader in an AI-powered world.
