QUESTION 1:

Do you think your main street /downtown is healthy and successful? What would you do to support continued success or help create the change you want to see?

I would like to see better lighting along walkways and parks. I would also like to see more community events and those that give back to the community. A senior center would be an amazing addition as we do have plenty of all ages that could benefit from a center to be used.

We do have a ballfield that I would like to see more utilized, along with a series of concerts leading up to the 4th of July for the summer.

QUESTION 2:

What are the community's housing needs and how will you help address them?

We are a small community that embraces the small-town feel. We do need to evaluate rentals in the area to ensure that we maintain the community we have grown to love.

QUESTION 3:

Describe your evaluation process when considering new public infrastructure for the community (e.g., roads, bridges, trails, etc.). What criteria goes into your vetting the project for funding and implementation?

Define goals and objectives, conduct research and analysis- gathering information and facts. Map out risks and challenges that we may face. Schedule deadlines, then assign responsibilities and tasks. Gather feedback and insight from the community.
