Re: Putnam County, FL Jail Expansion & Renovation

Dear Bob:

I wanted to let you and your team know how much Ajax Building Corporation appreciated Pauly Jail for the work you provided to our team on the Putnam County Jail project. The Putnam Jail project took place on an active and occupied Jail site and consisted of the addition of two secure housing pods (224 Beds Each). In addition to the new pods, a new medical and program facility was added and kitchen storage expanded.

Pauly's knowledge and expertise were of great benefit to our team during the design phase. As you are aware, steel cells are not typically used in Florida cell construction. You all provided detailed information to the team in analyzing the potential use of steel cells that not only provided cost comparison but also schedule and quality/maintenance information to the owner. Once you all were on-site for installation, you stayed involved to ensure the schedule dates were met and that the owner had a complete detention equipment system that they were satisfied with.

I have enjoyed the relationship we have developed with Pauly Jail and would without a doubt highly recommend you all to other Construction Managers that are looking for a great contractor to partner with on their next project.

Sincerely,
Ajax Building Corporation

John B. Smith, II
Vice President
