

# LEGO CLUB

This week's theme is vehicles! See the samples below or get creative and build your own! Share your LEGO creations with us as a comment to our LEGO Club video post!

## LEGO VEHICLE BUILDING CHALLENGE

### Here is what you need:

- Basic LEGO bricks
- Vehicle pieces: tires, axles, seats, doors

### Build your Vehicles:

Gather your pieces. A simple car can be built using LEGO pieces that almost everyone has. You will need several different types of pieces for this car, and you can vary the pieces used based on what you have.

Measurements for LEGO pieces are given in "stud" count (the "dots" on many LEGO pieces). A brick that is 2 studs wide by 4 studs long is a 2x4.

- For the chassis, you will need 4 tires of the same size, 2 rectangular axles of the same size, and a thin 4x12 plate (the long, thin LEGO pieces).
- For the body, you will need 2 2x2 bricks, 6 2x4 bricks, 4 1x2 bricks, 1 1x4 brick, 2 2x2 clear angular bricks, 1 LEGO windshield, and 1 LEGO steering wheel piece.
