Liberty Elementary School Improvement Plan September 2022

Statement of Mission, Vision, or Beliefs

Liberty Elementary School Mission Statement:

All students can learn. To develop the potential of all children, it is necessary to have a safe, positive, challenging, well-structured and interactive environment. The student, family, school, and community share this responsibility for learning.

Description and Location of the Curriculum

Curriculum maps are based on Indiana Academic and College & Career Readiness Standards. Teachers have copies of the curriculum map in their classrooms. A copy of the school's curriculum may also be found in the school office. As a corporation, we are reworking our curriculum maps with a focus on science for the 2022-2023 school year.

All parents are made aware of the grade level curriculum through weekly classroom newsletters with the purpose of informing parents what their child will be learning in the upcoming year. They are also given information on where to locate grade-level state standards through the Indiana Department of Education in various monthly newsletters.

Title and Descriptions of Assessment Instruments to Be Used In Addition To ILEARN

ILEARN, I-READ and I AM assessments will be given during the 2022-23 school year. Using NWEA MAP Growth assessments, grades K-5 will be assessing language arts and math skills with ongoing standards-based assessments and progress monitoring. MCLASS assessments will be given in grades K-2 to assess reading skills. Additional screening will be done in grades K-2 for the newly required dyslexia screenings. Grades K-5 will do *Beginning of the Year* and *End of the Year* writing and math facts assessments. Quarterly math facts data will be collected to monitor computation fluency in grades 1-5, with Kindergarten starting second semester. Grades 1-5 will also be completing beginning and end of the year school-based assessments.

Information About How the School's Curriculum Supports the Achievement of Indiana Academic Standards and College and Career Readiness State

Standards

The school's curriculum is based on the *Indiana Academic and College & Career Readiness Standards* with information about specific ideas and general timelines for teaching the standards included. Math curriculum maps have been developed with specific timelines for students' skill acquisition. Big Ideas and Essential Questions are posted in classrooms as visual reminders of what students are learning.

Information About How the School's Instructional Strategies Support the Achievement of the Indiana Academic and College & Career Readiness Standards

Teachers use a variety of research-based instructional strategies that support the Indiana Academic and College & Career Readiness Standards being taught. Daily Agendas, Morning Messages, and Morning Announcements (5th grade) are also geared toward these academic standards. The 5th grade is including information from the Social & Emotional Learning standards in their daily school announcements.

Math MTSS initiatives in grades K-5 are designed to provide lower ability math students with extra support to meet the Indiana math standards. High ability math groupings are designed to challenge identified math students by providing instruction of some standards above the students' grade level. Curriculum maps in mathematics include timelines, vocabulary, and essential questions that mirror the Indiana Academic and College & Career Readiness Standards and provide continuity throughout the grade levels.

Title I, Orton-Gillingham, and the reading MTSS programs provide extra help for students struggling in language arts areas. MTSS programs for students in grades K-2 include Foundations and Leveled Literacy Intervention. Programs for grades 3-5 include small group support for specific targeted skills. The current adoption of McGraw-Hill Reading series, *Wonders*, provides MTSS interventions that are also used.

Students in grades K-5 who are identified as High Ability in language arts, meet in small groups during MTSS time. During this daily 30 minute time, they work with novels, including discussions, vocabulary study, and culminating projects, that are more geared to HA students. Students in late kindergarten and 1st grade will also work in small, pull-out groups, with more advanced reading and vocabulary for their age level.

Students identified as High Ability in math also work in small groups during math MTSS time. Specific standards from higher grade levels are brought down in increasing numbers by grade level, so that they will eventually be ready to take Algebra I in 8th grade.

Data About Student Achievement Based On ILEARN and Other Assessment Instruments

ILEARN Results

*There is no 2019-2020 data due to COVID-19 school closures.

Indicator	2018-2019	State Average	2020-2021	State Average	2021-2022	State average

Conclusions About Student Achievement, Based on ILEARN and Other Assessment Instruments

Based on the 2020-2021 IREAD, NWEA, and mCLASS scores, the majority of our students demonstrated measurable growth toward grade level proficiency. However, on ILEARN we still find that our students' open-ended and constructed responses were not where we would like for them to be. We must continue to focus on math computation, fluency, mathematical reasoning, and constructed response items that require text evidence.

Parental Participation in School Activities and Events

We continue our efforts to increase our numbers of parents at beginning of the year events like Open House Night, Kindergarten Parent meetings, and Title I Parent meetings, by involving the whole family through socials and babysitting. At Open House and through school and classroom newsletters, parents are informed about the Indiana Academic and College & Career Readiness standards, assessments, classroom policies, and procedures for the upcoming school year. Information about how parents can help their child with homework, math fact fluency, and test-taking skills are among several topics included in monthly newsletters from the principal, and also in weekly newsletters from individual teachers.

During a normal school year, parents are invited and encouraged to attend and participate in such events as class plays, COSI on Wheels, Trivia Bee, Spelling Bee, Math Bowl, Family Literacy Night, Family Math & Science Night, Book Fairs, and musical concerts. Kindergarten and first grade teachers invite parents to a Super Bowl with Dads party, Grandparents' Day Celebration, and classroom parties. First grade parents are invited to participate in construction of Gingerbread Houses as a Christmas project. At the end of the school year, many parents attend the 4th grade Hoosier Wax Museum where students present their research projects about famous people from Indiana.

All students take home Friday Folders for parents to sign, indicating that they have viewed their child's performance on his/her weekly assignments. Some classes send home daily planners in which students are required to write all homework assignments for parents to view. Classroom web pages also help parents to stay informed and involved.

Liberty Elementary works hard to support parents and the families of our students. Facebook and other social media help us to communicate with our families. Through Gleaners Food Programs, we offer all our families the monthly *Corner Market* where any family can come to get food. We are also fortunate that our community churches offer a *Back to School Bash* where every student can come and get free haircuts, school supplies, and backpacks.

Technology Initiatives

We have a variety of levels of staff expertise involving technology. Each classroom teacher has a computer with a data projector as well as laptops for student use. A computer lab facilitates usage by individual classrooms, particularly for the primary students who are just learning to use a mouse or trackpad, during formative assessment times. Several classroom teachers have access to a sound amplification system designed to increase clarity, as well as student attention and focus.

All students have their own designated laptop or Chromebook. Teachers were offered training for Google Classroom during the Covid-19 pandemic. With technology as the venue, our students were presented with a myriad of learning opportunities outside the walls of the

traditional classroom, with favorable student participation—and parental satisfaction. However, the lack of reliable internet access was problematic for many of our families, not only for Liberty Elementary, but across the whole district. Families in our district now have the option of internet service for free or at a reduced rate through the Emergency Broadband Benefit Program. Currently, teachers utilize Google Classroom as a learning management system. This is especially beneficial for students who are quarantined, as they are able to access daily instruction and assignments.

8 Viewsonic boards were recently added to classrooms. There are currently 15 Smart Boards in the building as well. The technology department updated the infrastructure by putting in more data access points to improve internet access in all parts of the building.

We recognize that our approach to technology cannot be static, so in an attempt to foster collaboration toward curating digital lessons in the classroom, LES will invite colleagues to share their expertise with staff at technology-specific teachers' meetings.

Data About A Safe And Disciplined Learning Environment

INCIDENTS	2017-18	2018-19	2019-20 <i>*Only 3 quarters due to COVID-19 closings</i>	2020-21	2021-22
OUT OF SCHOOL SUSPENSIONS	14	13	8	3	0
IN SCHOOL SUSPENSIONS	4	2	4	10	10

DETENTIONS					
DISCIPLINARY DETENTIONS	62	38	13	29	18
ACADEMIC DETENTIONS	20	15	13	23	23
LUNCH DETENTIONS			39		20
BUS CONDUCT REPORTS	8	21	5	0	2

A Safe and Disciplined Learning Environment

A safe and disciplined learning environment and a positive school climate are two of the strengths of Liberty Elementary School. Evidence can be seen in the discipline statistics that show minimal discipline referrals for a school our size. Out-of-school suspensions are rare. Detentions are designated as behavioral or academic. Students who receive academic detentions have demonstrated irresponsibility in their weekly work.

During the 2019-20 school year, the Union County College Corner Joint School District collaborated with local law enforcement in order for volunteer officers to be present in the school buildings most days. Meridian Health Services and Centerstone are embedded in our schools with a behavioral clinician assigned to the building. Beginning with the 2020-2021 school year, our school corporation has hired a licensed social worker who will be housed in both elementary buildings and will focus on attendance within the district as well as be the liaison between the mental health services and the 4 schools in our corporation. Students also have access to trained therapy dogs who can assist them with emotional support.

While the school climate has always been positive, intentional steps using the LifeSkills model from C.L.A.S.S. ensure that this climate continues. Common language, procedures, rules, and consistent application of these procedures by all staff make expectations clear to students. Spending time taking a proactive approach to discipline by intentionally teaching LifeSkills, conflict resolution, and problem solving contribute to the learning environment that exists at Liberty Elementary School.

This being said, as our student population has been changing, we are finding ourselves dealing with more students who are coming to us from trauma-infused backgrounds. To address Social, Emotional & Behavioral Wellness standards within our classrooms, all staff will participate in Trust-Based Relational Intervention (TBRI) trainings throughout the school year.

SCHOOL IMPROVEMENT GOALS for 2022-2023

The first step in determining the goals for our school is to understand what goals have been predetermined. Public Law 221 requires that a goal for improving the attendance rate and a goal for the percentage of students passing ILEARN be included in the School Improvement Plan. The school goals also align with the corporation's goals for improvement.

GOAL #1

Students in grades 3-5 will exceed the state average proficiency rate in mathematics based on the ILEARN assessments.

STRATEGIES

- Every classroom will have math facts practice time sometime during each school day. Students will participate in weekly 2.5 minute timing assessments with progress charted by students and/or teachers. Students will also utilize the research based *Reflex Math* Computer program.
- Special area teachers will incorporate computation skill practice as well as problem solving with all students in a manner appropriate to their area once a week.
- Teachers will provide, at a minimum, weekly math prompts that encourage students to think critically and respond about the mathematics they are learning. These responses may be written or presented orally through the use of *Math Talks*.
- Teachers will provide access to materials, models, tools and/or technology-based resources that assist students with strategies necessary for engaging in mathematical processing.
- Daily, in grades 2-5, small groups will meet during Math MTSS time to practice multi-step word problems, math facts, spiraling of standards for review, as well as reviewing standards from recent lessons. In grades 4-5, these small groups/centers will be teacher-led by including the Title I and special education staff.
- The School Leadership Team will work with grade levels to develop grade-specific academic vocabulary lists and strategies for this goal. Staff will also make use of the *Math Frameworks* from the Indiana Department of Education.

RESULTS INDICATORS

- Student growth in math fluency, based on the 2.5 minute timed tests, will be analyzed every nine weeks to determine if strategies are effective.
- Improvement of quarterly math grades
- Improvement on weekly math fact assessments, IXL scores, Reflex Math scores and NWEA scores.

- Students in grades 3-5 will show progressive individual growth based on goals they set for themselves with their teachers on upcoming NWEA tests.

PERSONS RESPONSIBLE

- Classroom teachers
- Title I Staff
- Instructional Aides
- Administrator
- Students

GOAL #2

Students in grades 3-5 will exceed the state average proficiency rate in English Language Arts based on the ILEARN assessments.

STRATEGIES

- As a class or in small groups, modeling will be done to practice how to write exemplary responses using grade level content for constructed response questions that incorporate text evidence and appropriate content vocabulary. Focus will be placed on inferences garnered from text and supported by evidence found in the text.
- Students will practice comparing and contrasting ideas from paired text.
- Staff will also make use of the *Literacy Frameworks* from the Indiana Department of Education.
- Staff meetings/grade level meetings will be used to discuss strategies for using Depth of Knowledge questions.
- Special area teachers will give one open-ended or constructed response writing prompt each semester.
- The School Leadership Team will work with grade levels to develop grade-specific academic vocabulary lists and strategies for inclusion. Emphasis will be placed on using academic vocabulary as appropriate in all writing pieces and when responding orally.
 - MTSS groups will be created and teachers will work with students for 20-30 minutes daily on specific skills and strategies for reading.
- All staff will implement the *6 Traits Writing Process* at all grade levels, with specific traits being emphasized at each grade level. Students will be given ample opportunities to practice the various types of writing with emphasis on providing text evidence from given passages.

RESULTS INDICATORS

- Increase in scores on classroom assessments
 - Increase in scores on NWEA
 - Improvement in scores on any open-ended response questions
- Students in grades 3-5 will show progressive individual growth based on goals they set for themselves with their teachers on upcoming NWEA tests.

PERSONS RESPONSIBLE

- Administrator
- Teachers
- Title I staff
- Instructional Aides
- Students

GOAL #3

The percentage of student attendance will remain at 96% or higher as calculated by the school attendance officer.

STRATEGIES

- Staff will implement the current UCCCJSD attendance policy with regards to absenteeism and tardies.
- Parents will receive information in the monthly newsletters, at least once in the fall and spring, summarizing the risk factors associated with chronic absenteeism as well as benefits of being in school each day, on time.

RESULTS INDICATORS

- Increase in monthly attendance
- Number of habitual absentees will decline

- Academic success for habitual absentees will improve as monitored by classroom grades

PERSONS RESPONSIBLE

- Classroom teachers
- Principal
- Social worker
- School attendance officer
- Secretaries
- Parents
- Students

Professional Development

Much of the professional development for the staff at Liberty Elementary takes place through in-house training, as well as attendance at outside professional development opportunities. Professional development is available through corporation resources, the local Educational Service Center, and from the staff of the local Special Education Co-Op. Staff members have opportunities to participate in professional development sessions offered after school and in the summer.

We need to continue our efforts at improving our delivery of differentiated instruction to meet the needs of our high ability students, as well as our lower achieving students. Teachers of high ability language arts students will continue using literature units that provide rigor in this area. Teachers of high ability students are offered the opportunity to attend appropriate conferences outside of the district. The teachers of Liberty Elementary will take advantage of the IDOE's free professional development offerings through the Indiana Learning Lab. Teachers will also participate in two professional development days focusing on curriculum development.

In order to continue to improve our staff's understanding of ever-changing technology, we will better utilize the technology committee where in-house experts will share new ideas for using a variety of technology in the classrooms to support our curriculum. Individual staff members will share tech tips at the end of staff meetings. As staff members become more comfortable with new and existing programs and technologies, "interest groups" will be encouraged to share ideas and information with each other. Teachers will also be made aware of opportunities outside the building for upcoming workshops that are technology-based.

According to I.C. 20-30-5-14, schools need to include employability skills into their curriculum. During the 2022-2023 school year, LES will include opportunities for exploring career awareness, and learning about and achieving employability skills. The LES staff will use the Indiana Employability Skills Standards grade-bands in multi-subject areas. Students will be introduced to the Governor's Work Ethic Certificate that they have an opportunity to earn in their fifth grade year. Many of the employability skills match the Life Skills that we teach, model and use each month.

Timeline for Implementation, Review, and Revision

The School Improvement Leadership Team will meet regularly to monitor building progress and further develop some strategies to meet our goals. During the spring of 2023, the School Improvement Leadership Team will study the current data and progress made toward these goals. The plan will then begin to be revised and updated. Further updates will be addressed after the 2023 spring ILEARN and IAM assessments.
